

Dear Memorial Park Area Residents,

In light of the new west side branch library scheduled to start construction in 2012, we are planning to finish the Memorial Park Master plan improvements on the east side of the park. We are pleased to report that we will be installing a hockey rink this fall. The proposed construction schedule should have the Hockey Rink improvements ready to go for use in December 2010, prior to skating season. Starting in the latter part of September, the new hockey rink is going to be constructed on the North side of the existing Ice Skating Rink.

The new Hockey Rink will feature year-round fiberglass walls and a concrete slab. These two features will also allow the new rink to be used in the summer time. The rink will also be lit for nighttime use. Upon completion of the library project, we will finish the master plan improvements on the west side of the park. We also wanted you to know that we have included an exterior park restroom in the library project, so that the users of the park will have access to permanent restrooms in the future.

Please contact us if you have any questions about this project at 367.8222.
