## Lesson Manual B

*A Publication Of The USA Hockey Coaching Education Program*

The USA Hockey Coaching  
Education Program is Presented By

## SPECIFIC OBJECTIVES

1. Review stance, (Lesson A-1).
2. Review and continue gliding on two skates/balance, (Lesson A-2).
3. Review and continue gliding on one skate/balance, Lesson A-2).
4. Review scooting, (Lesson A-3).
5. Introduce scooting on circles.

## KEY INSTRUCTIONAL POINTS

### 1. Proper Stance:

- a. Skates parallel and shoulder width apart.
- b. Point toes straight ahead.
- c. Bend knees until they are in line with toes of the skates.
- d. Body leaning slightly forward.
- e. Head up.
- f. Two hands on stick; stick close to ice.

### 2. Gliding on two skates:

- a. Take a few skating strides to gain momentum.
- b. Assume the basic stance.
- c. Common errors:
  1. Ankles cave inward or outward.
  2. Knees press in towards each other.
  3. Legs are straight.
  4. Body is twisted.
  5. Upper body leans too far forward.
  6. Head is looking down at the ice.
  7. Not having two hands on the stick.
  8. Stick not close to the ice.

## 3. Gliding on one skate:

- a. The basic principle in skating is that one foot must be under the body's center of gravity at all times. Skating involves being on one foot or the other most of the time. It is therefore essential that hockey players learn to balance and glide on one foot.
  1. Take a few skating strides to gain momentum.
  2. Glide on one foot:
    - a. Keep the blade of the supporting skate flat on ice.
    - b. Maintain the basic stance on the supporting leg.
    - c. Glide in a straight line.
  3. Common errors:
    - a. Basic stance.
    - b. Weight is not being brought forward on supporting leg.
    - c. Player is on a single edge.

## 4. Scooting

- a. Involves T-push.
- b. Helps to improve pushing power and leg extension.
  1. Place the left skate behind the right skate, forming a T-push with left skate.
  2. Push down and out with left leg. Fully extend left leg, and glide on right foot.
  3. Bring left skate quickly up into a T-push position beside right skate before the next push is made.
  4. Practice using both skates.

# LESSON B-1

## 5. Groin Stretch – Warm-up:

- Extend the right leg (drag skate) backwards as you bend left leg to a 90 degree angle.
- Toe of drag skate points outward and the side of skate touches the ice.
- Keep head and shoulders up.
- Do not bounce.
- Hold position for 5-6 seconds.
- Repeat the next time with alternate leg.

## 6. Toe Touching – Warm-up:

- Arms and stick straight overhead.
- Bend at waist and touch toes while keeping legs as straight as possible.
- To full extension slowly.
- Hold position for 5-10 seconds.

## 7. Squat – Balance and Agility:

- If they are in the correct position their seats are down on their heels, their shoulders are over their knees, their arms out in front of them, back straight and head up. The stick is on the ice pointing forward.

## 8. Stationary Jumping:

- Have player start and land in basic skating position. It is important to start and land with knees flexed.

## TEACHING TOOLS NEEDED

- Agility boards
- Lightweight pucks
- Cross-ice rink boards

Jump as high and as far as possible.	8 minutes 
<b>Fun Time (introduce)</b> 	1. Each player is given a puck. 2. Players bend over and cross to the other side of ice while moving the puck along with their hand. 3. Cross the ice while pushing the puck with the skates. Push the puck ahead (one metre) with the inside of the skate blade. Alternate skates as you cross the ice. 4. Do each 3-4 times.	5 minutes

**Areas of Improvement:** \_\_\_\_\_

\_\_\_\_\_

## SPECIFIC OBJECTIVES

1. Review stance, gliding, and scooting, (Lesson B-1).
2. Review glide turns, (Lesson A-3).
3. Review stopping – one foot, making snow, (Lesson A-3).
4. Review and continue sideways movement, (Lesson A-4).
5. Introduce push and glide.

## KEY INSTRUCTIONAL POINTS

### 1. Glide Turns

- a. Skates are shoulder width apart.
- b. Lead with the inside skate.
- c. Head and shoulders initiate the turn.
- d. Bend the knees and lean inside.
- e. Rock back slightly on the heels.
- f. Follow the stick.
- g. Perform the drill in both directions.

### 2. One o'clock – Eleven O'clock Stops:

- a. One o'clock refers to pushing out with right skate towards one o'clock.
- b. Eleven o'clock refers to pushing out with left skate towards eleven o'clock.
  1. A stop in which the player remains facing forward.
  2. Glide on two skates in basic stance.
  3. Turn heel of right skate out and the toe of right skate in. Push skate out and down towards one o'clock.
  4. Keep weight on the ball of your foot as you stop.

## 3. Sideways Movement – Review.

- Players start from basic stance.
- The body moves at right angles to the direction in which the player is facing. Keep shoulders straight ahead.
- Steps must be taken flat-footed.
- Keep the stick out in front of you.
- Walk slowly at first. As the players pick up the drill, speed up the tempo.

## f. Progression:

- Put the right skate in front of left skate.
- Take the left skate from behind the right skate and place it back in the normal stance position.
- Repeat steps 1. and 2. as many times as required.

## 4. Sideways Movement:

- Same steps as Key Instruction Point Number 3 (a) through (e):
- Step (f) progression is changed slightly:
  - Put the right skate over the left skate, leading with the heel of the right skate over the toes of the left skate. Place the blade of right skate outside the left skate. Your legs are now crossed.
  - Take the left skate around behind the right skate and place it back in the normal stance position.
  - Repeat 1. and 2. as many times as required.
  - Practice both to the left and to the right.

## 5. Push and Glide:

- Skating is a series of push and glide movements with alternate legs. The player gathers himself/herself while gliding to prepare for going immediately into another stride with the opposite foot. Power is developed by taking fast, short strides. As speed increases, longer and less frequent strides may be taken to maintain speed.

- Rotate toe of driving leg outward (35 to 40 degrees).
- Push the skate down to the side and back, pressing the blade into the ice.
- To maximize the push, use the whole pushing leg from hip to toe. Extend the leg as far as possible. Final push is given by the toe of the skate.
- When the stride is finished, the weight is transferred to the forward foot and the pushing foot comes slightly off of the ice.
- Bring the driving leg forward after full extension and place it close to the gliding leg. Keep it close to ice on recovery.
- You are now ready to start the next stride with the opposite foot.

## TEACHING TOOLS NEEDED

- Pylons
- Cross-ice rink boards

## SPECIFIC OBJECTIVES

1. Review push and glide, (Lesson B-2).
2. Review one foot stop, (Lesson A-3 and B-2).
3. Review sideways movement, (Lesson A-4 and B-2).
4. Introduce front V-start.
5. Introduce edge control.

## KEY INSTRUCTIONAL POINTS

### 1. Front Start:

- a. Players in basic stance, skates shoulder width apart, knees flexed, and back straight.
- b. Turn heels in to make a "V" with your skates, while leaning slightly forward. This puts weight on front part of the blades.
- c. Drive off with either the right or left skate on the first stride and alternate legs with each stride. First stride with each foot is a short driving stride. More like running.
- d. Next two strides are longer. Angle of the blade nears 35-40 degrees at about the third or fourth stride.
- e. Skates are low to the ice for quick recovery.
- f. Gradually straighten up as speed increases to the maximum.
- g. Should be in full stride after the first six strides.

### 2. Edge Control:

- a. Players must be able to utilize both inside and outside edges of both skates. In drawing, player is on right outside edge, and left inside edge.

## TEACHING TOOLS NEEDED

## LESSON SUMMARY

**Successes:** \_\_\_\_\_

\_\_\_\_\_

**Areas of Improvement:** \_\_\_\_\_

\_\_\_\_\_

## SPECIFIC OBJECTIVES

1. Review Lesson B-1 through B-3.
2. Review puckhandling stance, (Lesson A-8).
3. Review stationary puckhandling, (Lesson A-8).

## KEY INSTRUCTIONAL POINTS

### 1. Puckhandling Stance:

- a. Stick length: When on skates, the stick should come up to an area between the collar bone and chin, so that free movement of the top hand in front of the body is possible.
- b. Stick lie: When assuming the correct skating stance, the blade should be flat on the ice.
- c. Younger players should have junior size sticks that have narrower shafts and shorter blades.

### The grip:

1. The top hand must be right at the end of the stick.
2. The lower hand should be 8-12 inches down the shaft.
3. The "V" formed by the thumb and forefinger should be pointing straight up the shaft.
4. Blade of stick is flat on the ice.
5. Keep the head up and use peripheral vision to look at puck. Younger players should be allowed to look and feel for the puck.

## 2. Stationary Puckhandling:

- Assume puckhandling stance.
- Move the puck from side to side by rolling the wrists. This cups the stick on both the forehand and backhand, thus allowing better control.
- To roll the wrists, turn the toe of the blade inward and the heel outward, then reverse direction.
- Puck is handled in the middle of the blade.
- Keep arms and upper body relaxed.
- Puck control must be smooth, rhythmical, and quiet.

## TEACHING TOOLS NEEDED

- Pylons
- Lightweight pucks
- Cross-ice rink boards

## SPECIFIC OBJECTIVES

1. Review edge control, (Lesson B-3 and B-4).
2. Review stationary puckhandling, (Lesson A-8 and B-4).
3. Introduce two-foot stop.
4. Introduce crossover pumping.
5. Review skating with puck, (Lesson A-8).

## KEY INSTRUCTIONAL POINTS

### 1. Two-foot Stop:

- a. Will stop more quickly than a one o'clock or eleven o'clock stop.
  1. Glide on both skates as you approach the stopping point.
  2. Basic stance – head up, knees bent, back straight, and feet shoulder width apart.
  3. Must turn sideways to the direction of travel, by turning the body to a right angle to the direction of motion. Turn initially to just the strong side.
  4. Begin the stop by turning the shoulders first with the hips and legs following.
  5. Turning the hips swings the outside leg into braking position. The inside leg acts as a pivot while turning into a braking position. Skates are shoulder width apart with the inside skate slightly ahead of the outside skate. The weight is equally distributed on both skates.
  6. Extend the legs vigorously while exerting pressure on the front part of the blades. We are using the inside edge of the outside skate and the outside edge of the inside skate, especially the inside edge of the lead skate.
  7. Keep head and shoulders straight.
  8. Keep two hands on the stick.

## 2. Crossover Pumping:

- a. Used to keep speed or to increase speed while skating on a curve.
  1. Skating on the circles.
  2. Push outside skate out toward the side keeping the blade in contact with the ice until the leg is fully extended.
  3. Push down on the ball of your foot at the end of the push so that you are using your ankles to get that little extra push from each stroke.
  4. Lean into the circle from the waist down by pushing your hips into the circle and keeping your inside shoulder up.
  5. After extension in step 2, swing your outside leg over the inside skate and place outside skate parallel to the inside skate but slightly ahead of it.
  6. The inside skate then pushes to full extension outward under the body (using outside edge).
  7. When fully extended, return it quickly to its original position under the body and beside the outside skate.
  8. Repeat the sequence in a continuous manner, pushing with equal force with both strokes.
  9. Repeat in both directions.

## 3. Skating with puck:

- a. Start attempting to introduce the split-vision concept.
- b. At first try carrying the puck by looking ahead of you with frequent glances down to control it.
- c. Use split-vision to see puck on your stick.
- d. Keep puck out in front of body.
- e. Keep hands in front of body and on your stick.

SKILL	DESCRIPTION	TIME
<b>Free Skate</b>	1. Each player is given a puck. They skate in a counter-clockwise direction, practicing their puckhandling skills. They must control the puck going across the ice using the skates. Turn the toe out and kick the puck three feet. Alternate skates as you go.	4 minutes 
<b>Balance and Agility (review)</b> 	1. Players line up on boards. Take 3-4 strides and continue across the ice by: <ol style="list-style-type: none"> <li>Gliding on two skates in a squat position.</li> <li>Gliding on one skate in a zig-zag motion going from the outside to the inside edge. Do on both skates twice.</li> </ol> 2. Execute a front start (4-5 running strides) and skate across to a pylon. Perform a tight turn around the pylon and return to original position. Repeat turning in the opposite direction.           3. <b>Edge Control (review)</b> 	1. Players partner up. One player will pull his partner using two hockey sticks. Lead player holds the sticks by the blades, pointing down.           2. Player being pulled, glides on one skate and wobbles, transferring the weight back and forth from inside edge to outside edge.           3. Repeat coming back with the other leg.           4. Partners switch positions and repeat.           5. Repeat so each player does repetition twice.	5 minutes 
<b>Puckhandling Stance and Stationary Puckhandling (review)</b>	1. Review and demonstrate key point.           2. Each player has a puck and follows the coach's movements. Move puck out in front of the body from side to side. Move puck at side of body from front to back.           3. Have players repeat movements in 2. but also call out number of fingers the coach is holding up.           4. Coach skates slowly backwards and players skate slowly forward, moving puck from side to side. Try to keep heads up.	5 minutes

**Areas of Improvement:** \_\_\_\_\_

## SPECIFIC OBJECTIVES

1. Review two-foot stop, (Lesson B-5).
2. Review crossover pumping, (Lesson B-5).
3. Review skating with the puck, (Lesson B-5).
4. Review backward stance, (Lesson A-5).
5. Review backward C-cut, (Lesson A-6).
6. Review backward V-stop, (Lesson A-6).
7. Introduce reversing direction (Two-foot stop) and T-push.

## KEY INSTRUCTIONAL POINTS

### 1. Backward Stance:

- a. Skating backwards is like sitting in a chair.
- b. Keep the knees bent and the back straight.
- c. Feet and knees are shoulder width apart.
- d. Lower the center of gravity by keeping the butt down.
- e. Keep the head up, chest out, and the shoulders back.
- f. Weight evenly distributed along blade of each skate.

### 2. Backward C-cut:

- a. Start from basic stance.
- b. Turn heel of right skate (driving leg) outward as far as possible. Rotation of leg at the hip also takes place inward.
- c. From bent knee position and pressing on the ball of foot, extend the leg by pushing hard and making a semi-circle cut in the ice with the blade. Ensure weight transfer is on to the driving leg.
- d. Final thrust comes from toe of the skate blade as the ankle is flexed.
- e. Return the right skate to its original position beside the left skate.
- f. The left leg (supporting leg) must stay directly under the player's body.
- g. Repeat with the left skate.

# LESSON B-6

## 3. Backward V-stop:

- Spread feet shoulder width apart.
- Toes of both skates are turned out and the heels are turned in.
- The body leans forward, this forces the inside edges of the skates against the ice.
- Slight bend in knees during first phase of stop.
- Legs become extended during final phase of stop. Pressure is thus exerted through the skate blade.
- When stop is completed the player should end up in the basic stance, prepared to go off in any direction.

## 4. Reversing Directions:

- Perform a two-foot stop.
- Perform a T-push to get started in the reverse direction.
  - Place front skate in the direction of movement.
  - Place the back skate slightly behind the front skate, thus forming a "T". Keep the whole blade flat on the ice. Keep weight on the back skate.
  - Give a strong push with the back skate. This involves a straightening of the back leg pushing the skate down against the ice.
  - Stress the head up, knees well bent, leg fully extended, and recovery skate close to the ice on recovery.
- After T-push resume striding to gain speed.

## TEACHING TOOLS NEEDED

- Agility boards
- Pylons
- Tennis balls
- Rope 15-18 feet long
- Can of spray paint
- Cross-ice rink boards

- h. Skates are now in a position for T-push start, (Lesson B-6).

# LESSON B-7

## 3. Push and glide backwards:

- Players are in motion backwards.
- All weight should be on one skate with skates close together when stride begins.
- Using the front part of blade, push straight out to the side until pushing leg is fully extended. (Rotate hip.)
- Glide while pushing leg is recovering to a position under the body. Recover close to ice.
- Repeat with opposite leg.

1. Review backward one-foot stop and T-push, (Lesson B-7).
2. Review gliding backward on one skate, (Lesson B-7).
3. Introduce pivot – backwards to forward.
4. Introduce pivot – forward to backwards.

## KEY INSTRUCTIONAL POINTS

### 1. Pivot (Backwards to forward):

- a. Players are in motion backwards.
- b. To turn to the left, transfer the weight to the right skate.
- c. Turn is started by rotating the left shoulder backward. The torso and hips will follow.
- d. Lift the left skate off the ice and turn it as close to 180 degrees as possible. Glide straight back on right skate.
- e. Transfer the weight to the left foot to complete the turn.
- f. At moment of weight transfer, the player must dig in right skate and push hard, fully extending the right leg.
- g. You are now ready to start forward striding.
- h. It is important to accelerate out of the turn.
- i. Must learn to turn to both sides.

## 2. Pivot (Forward to backwards):

- Players gain forward momentum and coast on the left skate.
- The player straightens up and rotates his right skate outward (as close to 180 degrees as possible) in almost a heel to heel position. Turn is started by rotating right shoulder backwards. The torso and hips will follow.
- Transfer the weight from the left skate to the right skate; step down on right skate and unweight your skates by going from bent knees to straight legs. This will help in transferring from left to right skate.
- Finish pivot by turning the left skate so that it is parallel with the right skate.
- Push to side with right skate and start to skate backwards.
- Must learn to turn both sides.

Areas of Improvement: \_\_\_\_\_

## SPECIFIC OBJECTIVES

1. Review Lesson B-4 to B-8.
2. Introduce tight turns.

## KEY INSTRUCTIONAL POINTS

### 1. Tight Turns:

- a. Permits a player to change direction in a very limited space while expending the least energy. Must be mastered to both sides.

1. Stop skating and let yourself glide into the approach.
2. Head up, knees bent, and feet shoulder width apart.
3. Place the skate on the side you wish to turn directly in front of the other, heel to toe.
4. Turn your head and shoulders in the direction you want to go and bring your arms and stick to the same side.
5. Lean well from the hips down inside the half circle that your skates will trace on the ice.
6. Weight should be as evenly distributed as possible on both skates. Pressure is on outside edge of leading foot and inside edge of following foot.
7. Skates should be close together and center of gravity ahead of skates, in order to be able to crossover after the tight turn and to accelerate rapidly.
8. Do not sit back on your blades.
9. Once skates have travelled a complete half moon on the ice, player executes a crossover start by bringing the back leg over the front leg in order to accelerate out of the turn.

## TEACHING TOOLS NEEDED

1. Pylons
2. Lightweight pucks
3. Cross-ice rink boards

# LESSON B-12

## 2. Stationary Passing:

### a. Forehand sweep pass:

It is very important that each player has a stick that is not too long, (Lesson A-8).

1. Player is in the normal puckhandling stance.
2. Bring the puck beyond the plane of the body.  
Puck is in the middle portion of the stick blade.
3. Stick blade should be at right angles to the target.
4. Body weight is on the back leg.
5. Head is up looking at the target, make eye contact with receiver.

6. Puck is propelled towards target with a sweeping action of the arms. (Pull with the top hand and push with the bottom hand.)
7. As the puck is propelled, the weight is transferred from the rear leg to the front leg.
8. Follow through low and towards the target.
9. Be prepared to receive.

### b. Receiving a pass on forehand:

1. Head up looking at the puck, make eye contact with passer.
2. Present a target with stick blade on the ice.
3. Keep blade at 90° towards direction of puck.
4. As the puck contacts the blade, some give is allowed, providing a cushioning effect.
5. Watch puck throughout pass reception.
6. Be prepared to pass.

c. Backhand sweep pass:

1. Hands are well away from the body.
2. Bring the puck beyond the plane of the body.
3. Shift the weight to the back leg.
4. Head up looking at target, make eye contact with receiver.
5. Cup the blade of the stick over the puck.

6. Sweeping action of stick across the body to slide the puck.
7. Shift weight to the front foot.
8. Follow through low.
9. Be prepared to receive.

d. Receiving a pass on the backhand:

1. Head up watching the puck, make eye contact with passer.
2. Stick is on the ice for a target.
3. Cup your stick and cushion the impact by relaxing the wrists.
4. Be prepared to pass.

## TEACHING TOOLS NEEDED

## SPECIFIC OBJECTIVES

1. Review stopping with the puck, (Lesson B-12).
2. Review stationary passing, (Lesson A-12, A-13, B-12).
3. Review skating and passing, (Lesson A-14).
4. Introduce lead pass to a moving target.
5. Introduce bank pass to partner.

## KEY INSTRUCTIONAL POINTS

### 1. Skating and passing:

- a. Remember key points about open ice carry in Lesson A-9.
- b. Remember key points on forehand pass and backhand pass (Lesson B-12).

### 2. Lead pass to a moving target:

- a. Fastest way to advance puck up the ice to a teammate is by passing it.
- b. Passer must develop quick reaction to passing opportunities.
- c. Passer can not telegraph pass.
- d. Passer must be able to watch receiver and gauge his distance and speed while controlling the puck.
- e. Pass to a spot ahead of your teammate so that he can skate into the moving puck. Called "leading the man" with the pass.

### 3. Board pass to partner:

- a. Make boards work for you in passing the puck.
- b. Used frequently by defenseman in their own zone.
- c. Useful when a defender is between you and your receiver.
- d. A puck passed off the boards rebounds away at the same angle. In other words, the angle onto the boards equals the angle off of the boards.

### 4. Toe In:

- a. Take 3-4 strides and start gliding.
- b. Lift right foot off ice.
- c. Place toe of right foot against toe of left foot and turn the right heel outward as far as it will go. (Try for a right angle.)
