Trends of first-time 4 to 8 year-old male ice hockey players – 1997-98 to 2007-08

- p.2 -Background and Methodology*
- p.3 -National Acquisition and Retention figures*
- p.4-5 -Iowa Acquisition and Retention figures*
- p.6-7 -Kansas Acquisition and Retention figures*
- p.8-9 -Nebraska Acquisition and Retention figures*
- p.10 -Key Takeaway Points*
- p.11 -State by State Rankings*
- p.12 -Map of 10-year Average Retention Rates*

USA HOCKEY MEMBERSHIP DEVELOPMENT

Background

USA Hockey's Membership Development Department has been conducting comprehensive research to gain a deeper understanding as to why certain segments of USA Hockey membership – most notably the core male ice hockey segment – have been shrinking in recent years.

This study isolated the behavior of first-time 4 to 8 year olds in determining the likelihood of returning for a second season. The data stretches back a full 10 years beginning in the 1997-98 season and runs through the most recent season 2007-08. The data is further segmented by state enabling us to analyze trends based on geography and in light of historical strengths and weaknesses. For example, the state of Massachusetts has been a consistent leader in attracting new hockey players especially in this age group. Yet like most states, acquisition numbers have been sliding for at least a decade accompanied by a parallel drop in retention numbers.

It is important to note however, that one of the key metrics of this study focuses on the *rate of retention* – that is the *percentage* of retained members from the universe of acquired members from the prior year. For example, if a state signs up 1,000 first-time players this season and 700 players return the next season, then the retention rate for that state is 70 percent. If in three years the same state signs up only 800 first-time players and 560 players return the next season, then the retention rate would also be 70 percent.

In many cases within the USA Hockey family, retention rates have been remarkably consistent in recent years averaging close to 70 percent across the country. It has been a drop in the acquisition of new first-timers that has been the primary cause of membership slippage in recent years. Such conditions require USA Hockey's Membership Development Department to travel concurrent paths in mounting future growth initiatives:

- A comprehensive *retention strategy* to insure that we keep as many members as possible from one season to the next; and
- A comprehensive *acquisition strategy* to insure that we attract as many prospective new members every season

Clearly, this two-pronged approach requires a coordinated effort with USA Hockey's Membership Development Department and youth hockey volunteers at the grass roots level across the country.

The following analysis based on secondary data provided by Assistant Executive Director of Member Services Rae Briggie and her staff in the national office of USA Hockey. We anticipate that additional research including additional quantitative as well as qualitative studies all the way down to the local program level will be conducted over the coming months in order to determine the best course of action in order to insure the future health of the game of hockey.

Methodology

This study focused on the very youngest age groups – boys ages 4 through 8 – and further isolated those members that signed up to play ice hockey for the very first time. The sample, then, is made up of first-time 4, 5, 6, 7, and 8 year olds in each of the last 10 seasons beginning with the 1998-99 season through the 2007-08 season. This methodology allows us to measure the (a) number of NEWLY ACQUIRED players (the ONES); (b) number of RETAINED players (the TWOS); (c) the number of LOST players; as well as (d) the RETENTION RATE of players by age segment in each of the last 10 seasons.

The study further allows us to isolate these results on a state-by-state basis to determine behavioral trends based on geography and in light of historical results based on decades of registration figures.

National View

ACQUISITION

- Acquisition of first-time players is down **22.1%** over the last 10 years
 - Acquired 32,270 first-time players in 2006-07 – down from 41,380 in 1997-98
- Acquisition has steadily declined over the last 10 years but was up **7.9%** in 2006-07

USA HOCKEY ACQUISITION OF NEW PLAYERS				
Season	NEW	vs PY#	*+/-	vs PY%
1997-98	41380	N/A	N/A	N/A
1998-99	42587	41380	1207	2.9%

2005-06	158	146	12	8.2%
2006-07	153	158	(5)	-3.2%
2007-08	141	153	(12)	-7.8%

Iowa

RETENTION RATE

- Retention rate of **67.1%** in 2007-08, compared to a national average of **69.1%**
- Retention rate rank: **30th** in the country in 2007-08

Iowa Rate of Retaining New Players		
Season	Rate	Rank
1998-99	71.9%	N/A
1999-00	63.5%	N/A
2000-01	62.7%	N/A
2001-02	67.2%	N/A
2002-03	74.0%	N/A
2003-04	63.5%	N/A
2004-05	64.3%	N/A
2005-06	70.2%	N/A
2006-07	63.2%	N/A
2007-08	67.1%	30
10-year average	66.8%	28

KEY TAKEAWAY POINTS

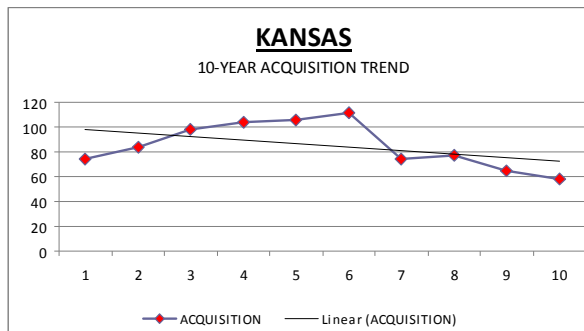

- Acquisition has been in a consistent decline over the past 10 years, but showed decent growth during the 2001-02 and 2002-03 seasons
- Retention has mirrored the acquisition decline and dropped significantly during the 2004-05 season
- Retention rate has fluctuated over the past 10 years but has performed below the national average

Kansas

ACQUISITION

- Down **21.7%** over the past 10 years, compared to a national average of down **22.1%**
- Acquired **58** first-time players in 2006-07, down from **74** in 1997-98
- Acquisition rank: **42nd** in the country in 2006-07

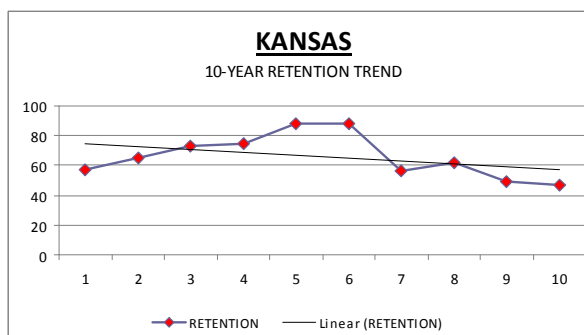

Kansas Acquisition of New Players				
Season	New	vs PY#	*+/-	vs PY%

2006-07	75.4%	N/A
2007-08	81.0%	2
10-year average	77.6%	1

KEY TAKEAWAY POINTS

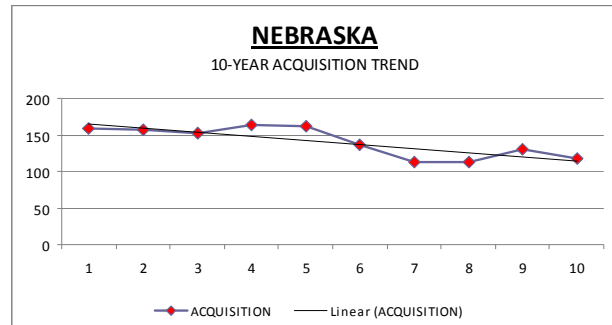

- Acquisition was strong until the 2003-04 season, where it dropped by 33%.
- Retention has mirrored acquisition and similarly is down three of the past four seasons.
- Retention rate is the best in the country over the past 10 years.

Nebraska

ACQUISITION

- Down **26.0%** over the past 10 years, compared to a national average of down **22.1%**
- Acquired **117** first-time players in 2006-07, down from **158** in 1997-98
- Acquisition rank: **38th** in the country in 2006-07

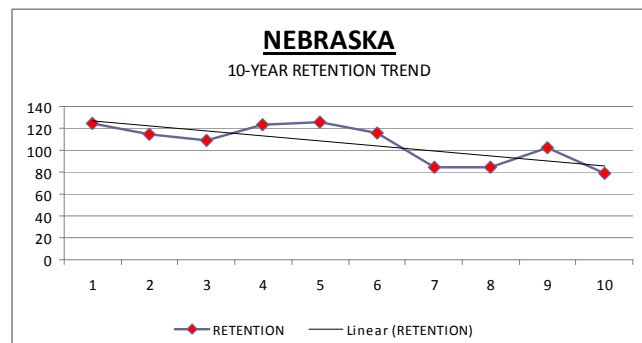

Nebraska Acquisition of New Players				
Season	New	vs PY#	*+/-	vs PY%
1997-98	158	N/A	N/A	N/A

Nebraska

RETENTION RATE

- Retention rate of **67.5%** in 2007-08, compared to a national average of **69.1%**
- Retention rate rank: **28th** in the country in 2007-08

Nebraska Rate of Retaining New Players		
Season	Rate	Rank
1998-99	79.1%	N/A
1999-00	73.2%	N/A
2000-01	71.7%	N/A
2001-02	75.0%	N/A
2002-03	77.8%	N/A
2003-04	84.7%	N/A
2004-05	75.9%	N/A
2005-06	75.0%	N/A
2006-07	78.5%	N/A
2007-08	67.5%	28
10-year average	75.8%	3

KEY TAKEAWAY POINTS

- Acquisition is down in six of the past 10 seasons and consistent with the national average.
- Retention is down in four of the past five seasons and below the national average.
- Retention rate is among the best in the country but dipped below 68% last season for the first time in 10 years.

State By State Rankings

The following is a summary of each state's ranking in acquisition, retention and retention rate for the 2006-07 and 2007-08 seasons, as well as a 10-year cumulative retention rate ranking. For the purpose of this graph, a player who was counted as an "acquisition" in 2006-07 would be "retained" for the 2007-08 season. This is the most up-to-date information available, as the retention figures from 2008-09 are still being compiled.

For example: In 2006-07, Alaska was 17th of 50 states in acquisition. The following season, they were 18th of 50 states in retention and 40th of 50 states in retention rate. Over the past 10 years, Alaska has retained 66.1% of first-year participants, which is 30th of 50 states.
