² A "Concussion" is a type of traumatic brain injury as recognized by the Centers for Disease Control and Prevention. A concussion may cause a change in a person's mental status at the time of the injury including, but not limited to feeling dazed, disoriented, or confused, and may or may not include a loss of consciousness. A concussion may be caused by any type of accident or injury including, but not limited to the following: a fall, blow, bump or jolt to the head or body, the shaking or spinning of the head or body, or the acceleration and deceleration of the head.

³ Return to play guidelines may be found at: http://www.cdc.gov/concussion/headsup/return to play.html and should only be administered by an appropriate health professional.
