INTRODUCTION

Training plan organization

The coach's work starts before arriving at the soccer field.

Planning the session correctly, for the week and the season, will help the coach identify the team's needs and deliver a more efficient training session. Properly preparing a training session gives the coach greater confidence with the players and a better understanding of how to adapt the exercises to the team's and players' needs on the field. A good coach is a good planner.

Using the age appropriate season-plan provided in the coaching guides, the coach will have the key tools to organize and plan the training session for the team. The numbers 1 to 5 will designate the importance of different technical, tactical, physical and psychosocial aspects of the game. For example, a number 5 in passing and receiving for the U14 age group means that this element is extremely important at that age.

Two teams of the same age group will have different ability levels and understanding of the game. In other words, even teams of the same age have different needs. For this reason, the exercises should be delivered according to a particular age group. This document contains the information necessary to create your own plan according to your team.

These are the steps to follow when preparing a plan:

SEASON PLAN

This section will help the coach to quickly organize the season into competitive periods, transition periods (in between competitive periods) and off-season periods in the case of the older age groups. For younger groups, it will be even more essential to have a broader vision of the objectives, content, distribution and means of use during the season.

MACROCYCLE OR 12-WEEK PROGRAM CYCLE

The coach can use this plan as it is presented in this document. This 12-week distribution of content ensures that all key elements in the curriculum are covered for each stage and age group. It is organized in two-week periods to give the player enough time to show significant improvement in the specific categories. Please note, this content distribution follows an appropriate order for developing the style and principles of play.

MICROCYCLE OR WEEK PROGRAM

This section helps the coach organize weekly training sessions. Each week has a main technical, tactical and physical objective specified in the macrocycle. However, each team is different and has its own learning dynamic. Therefore, the weekly plan is flexible. The team will evolve week after week and the coach must continually identify the team's needs.

SESSION

Sessions are the last step of the planning process. In this section the coach can see what sessions look-like for the different stages. Each session is structured the same way, including the following parts: warm-up, main part and scrimmage. The main part contains technical, tactical and physical exercises. The coach can use the exercises in the library to select appropriate drills for the team and create his/her own training sessions.

Some of the specific organization for the season applies only to the intermediate and advanced stages. The advanced and intermediate stages may change training organization throughout the season in order to be more efficient in competition. The initial and basic stages emphasize development consistency of session structure, in order to consolidate the basics of soccer.

PRINCIPLES OF SEASONAL PLANNING FOR DEVELOPMENT

Here is the organization for the season based on three **12-week cyclic periods**. Each one of these 12-week periods is called a **macrocycle**. This 12-week period will be similar in structure in all three stages of the season. *As coach, you can adapt and modify the length of the macrocycle depending on the needs of your team and season.*

Example structure for a season with three different periods for intermediate and advanced stages:

1. Competitive: Period when the team is training and playing games regularly.
2. Transition: Period when the team is training but not playing regularly.
3. Off-season: Period when the team is not training or playing regularly.

PERIODS	OFF	COMPETITIVE I			TRANSITION			COMPETITIVE II			OFF SEASON	
		1	2	3	4	5	6	7	8	9		
MONTHS	Aug	Sept	Oct	Nov	Dec	Jan	Feb	March	April	May	June	July

WHY IS IT IMPORTANT TO STRUCTURE THE SEASON FOR THE DIFFERENT AGE GROUPS? (THE NEXT FOUR POINTS APPLY ONLY TO INTERMEDIATE AND ADVANCED STAGES)

1. Players follow a repetitive 12-week program. The 12-week structure is repeated three times in the season with common objectives but different content according to the moment of the season.
2. The season is organized in 12-weeks periods so that during this time the player will build his game-understanding as well as develop the soccer-specific fitness necessary to perform in competition.
3. Characteristics for the different periods (e.g. Competitive I, Transition and Competitive II) are explained later in this document.
4. This organization gives structure to the content and make sure coaches not only cover all key elements of the game, but do so according to the age of the players. We know that in human development, a 6 year old player does not perceive the game as a 12 year old or as a 17 year old does.

IMPORTANT NOTES FOR THE TABLE ON THE NEXT PAGE

1. The technical, tactical and physical objectives will focus coaches' and players' attention on that particular objective for a two-week period. However, it does not mean that only that particular objective is covered in all training sessions. Instead, the specific objective will be covered in **at least** one training session during the two-week period. This ensures that the essential content for that specific age-group will be covered.
2. The coach will also cover other aspects of the game that the team needs to improve.
3. The arrow indicates the main objective for the two-week period.
4. Please, check the arrows in the content sheet by age in order to cover other specific, age-appropriate content.

Main objectives for the **12-week program** in the different stages are indicated in the sample below. The arrow indicates the main objective in that stage:

WEEKLY PLAN

Below applies only to intermediate and advanced stages

The game is the most demanding practice of the player's week. The intensity will decrease at the beginning of the week, increase closer to the level of game intensity at the middle of the week and then decrease again at the end of the week to provide the body enough time to recover for the game. These principles apply mainly to intermediate and advanced stage players.

The weekly plan is organized as indicated in the graphic:

1. TACTICAL

At the beginning of the week, the coach will use simple practices which increase in complexity throughout the week.

2. TECHNICAL

At the beginning of the week, the coach will use more unopposed practices focused on the quality of execution. By the end of the week, the coach will use opposed practices to increase speed, competitiveness and awareness.

3. PHYSICAL

At the beginning of the week, the physical work will focus on strength and injury prevention. By the middle of the week, the workload will increase using endurance training methods; and at the end of the week the training will focus on speed.

STRUCTURE OF THE TRAINING SESSION

For the initial, basic, intermediate and advanced stages

Sessions for all age groups cover tactical, technical, physical and psychosocial objectives. The exception to this are the sessions for players in the initial stage, which cover only technical, physical and psychosocial objectives because of the age and developmental characteristics of this group.

The session is organized into three blocks: Warm-up, main part (which includes technical, physical and tactical exercises) and scrimmage or free play. Training sessions follow the structure indicated below. However, the three parts of the session can be shorter or longer in duration and the sections within the main part can be interchanged depending on the type of exercise. Please note that any of the explanations below are recommendations and not prescriptions.

	SCRIMMAGE (25-30 min)		Free game including the concepts worked in the session	

STRUCTURE OF THE TRAINING SESSION

Flexible components

Aspects that are flexible and help organize the practice:

SPACE	Keep the organization of the space simple. The initial set up, with small changes, should be maintained throughout the whole session. Resetting cones during a session can easily disturb the flow of training. Attention during the session should be focussed on making the coaching points.
TIME	Time is flexible. Let the practice flow and make the coaching points at the right time, using breaks to give feedback to the group.
INTENSITY	Use short periods of time at high-intensity and utilize resting periods to explain the practices or make coaching points.
RULES	Use different rules to adapt the practices to the characteristics of the players and make the exercises age-appropriate.
NUMBER OF PLAYERS	Practice should progress from smaller to bigger groups of players. Use support players to create superiority in numbers and to make the exercises easier for the attackers.

PASSING & RECEIVING

Practice 3: Pass and switching play

UNOPPOSED

TECHNICAL

OBJECTIVE: Improve the quality and speed of passing, receiving and turning in short and mid-range distances using different angles.

AREAS		STRUCTURE	
Technical	Passing and receiving	Space	60x40 yards
Tactical	Switching play	Time	15 min

ADVANCED STAGE

AEROBIC POWER

Practice 1: End zone with support players

GAME

PHYSICAL

PHYSICAL/PHYSIOLOGICAL EFFECT: Increase efficiency by combining aerobic and anaerobic systems to perform at very high-intensity.

AREAS		STRUCTURE	
Technical	Aerobic power	Space	60x40 yards
Tactical	Transition	Time	20 min
Physical	Passing	Age Recommended	U15+
Psychosocial	Cooperation	Difficulty (1 to 5)	4

ORGANIZATION	
Players	18+
Equipment	12 cones and 8 balls
Description	6v6+6 game. Score by completing five consecutive passes in one half. Once a team completes five passes, transfer the ball to the other half. The two players in the end zone join the attacking team. Variation 1: Limit the number of touches for the team in possession Variation 2: Teams must complete a pass to support player on the side before transferring the ball to the other half.
Justification	Due to the intensity of the exercise (around 90% HRmax), this type of exercise is designed to reach VO2max as fast as possible. Once the VO2max is reached the body will combine aerobic and anaerobic systems to tolerate high-intensity exercise. The player will be focused on the game and will not notice the physical work.

WORKLOAD

1. 3 min
2. Sets: 4
3. Rest between sets: 1 min

ADVANCED STAGE

ATTACKING PRINCIPLES

3. Passing options – decision-making
4. Width and depth
5. Creating 2v1 situations

** Can include goalkeepers

QUANTIFICATION

Identifying the needs of the team is essential in order to quantify the work during the training sessions and make a proper analysis of the game.

In this section there are samples presented to quantify the number of times that one topic or subject is covered in the training sessions during a month and during the season. As coaches, we can compare that number with the number specified in the season plan for that particular age group.

For example, a 5 in the season plan for a U14 team in the passing and receiving category means that the team must have a high amount of passing and receiving practices during the month.

4 SPREADSHEETS ARE PRESENTED IN THIS SECTION

1. Technical
2. Tactical
3. Physical
4. Psychosocial

Each one of the spreadsheets records the number of times one topic or subject has been covered in the training sessions.

Also in this section, a spreadsheet is presented to identify the team's strengths and weaknesses during the game. This information provides the coach with a better understanding of which categories or areas the team needs to improve.

Also included in this section is the team and player evaluation.
