

Cases

Innovative & Intelligent Palletizing

WHY A PASCO[®] CASE PALLETIZER?

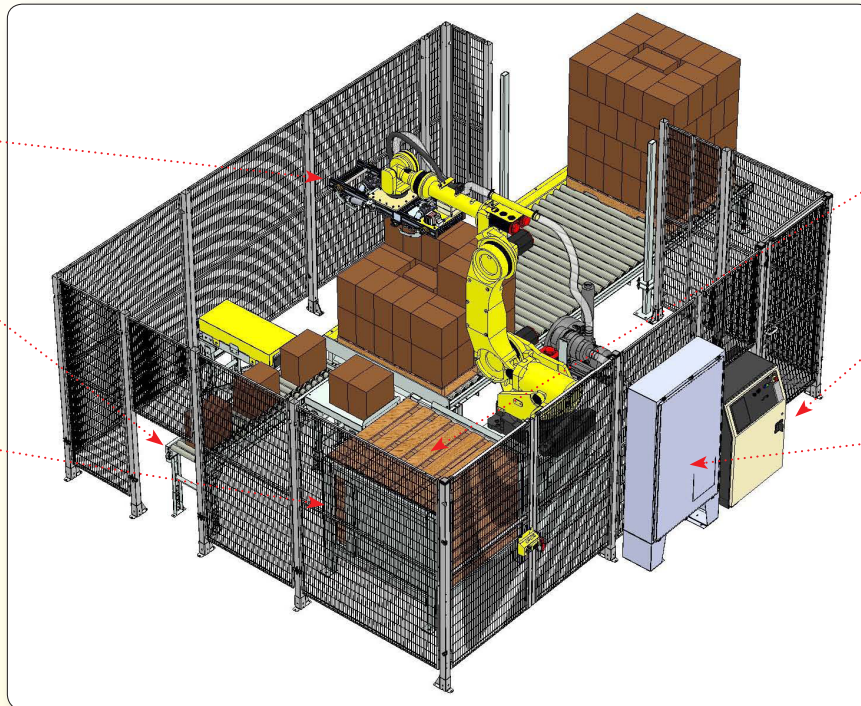

- 1** Save time & money - stack cases or boxes with **very little labor**
- 2** Flexibility - can be built to stack **multiple patterns & case sizes**
- 3** 1-year - **Zero Risk Warranty**

INNOVATIVE FEATURES:

FANUC robotic articulating arm with PASCO designed end of arm tool

Equipment can handle multiple product infeed lines as well as multiple build zones for different SKUs

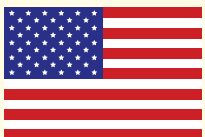

Safety systems fully interlocked & designed to fit this space

End of arm tooling can be used to pick pallets & place slipsheets between layers

User friendly operator interface for ease of training & use

Programming & custom controls assure years of efficient operation

Cases

Innovative & Intelligent Palletizing

PASCO case palletizers are designed with speed and flexibility in mind. Custom end of arm tooling can pick one case or an entire layer of cases and anything in between. Designed to suit each customer's specific needs, our case palletizers range from semi-automatic to multiple infeed and build zones. We also integrate upstream equipment such as case sealers, barcode readers, and labelers as well as wrappers and strappers for full pallet handling.

FANUC Robotics | Largest supplier of robots worldwide.

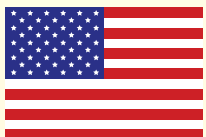

Tight, Square Loads | Creates secure pallet loads from many different sizes of cases.

End of Arm Tooling | Zoned vacuum pads for flexibility.

TECHNICAL SPECIFICATIONS - PALLETIZER

Product Applications:	Bags, Cases, Trays, Totes, etc.
Maximum Container Weight:	Products up to 100#, heavy duty options available
Typical Palletizing Rates:	Up to 24/min. single pieces, up to 50/min. multi-pick
System Footprint:	System footprints start at 12' x 17'
