WHO WE ARE

Integral Hockey Stick Repair is proud to offer the most technologically advanced composite hockey stick repair on the market.

WHAT WE DO

We bring 27 years of high-tech composites to this business. With our state-of-the-art process we achieve something that few can and will, namely, ultimate strength-to-weight ratios.

We've taken a very real problem and solved it with the most high-tech solution on the market and delivering it at a price that will work for everyone - something that we're very proud of.

"I had a chance to use a stick repaired by Integral Hockey Stick Repair. At first I was very skeptical about using a recycled stick. But after using it, I found it to be no different from my other sticks on my rack. It was just as strong as my other sticks and a week later, I found myself searching the shaft of my sticks to see which stick was the one that was repaired - because honestly, I couldn't tell the difference between the three. I definitely support Integral Hockey and would recommend them to anyone wanting to save some money and use a stick that feels like new."

Jason Jaffray - Winnipeg Jets Organization
