

www.quickscores.com/slchockey Calendar Subscribing Tips

The league schedule for Salt Lake County Youth Hockey can be found at www.quickscores.com/slchockey . One of the main reasons we use this service is it allows you to subscribe to your team's schedule. This feature then syncs the schedule to your mobile device.

To begin this process, click on the Division of the team you wish to subscribe to, then press subscribe. Next, choose the team you wish to subscribe to. If you don't choose a team, you will subscribe to the entire Division's schedule! To allow your calendar to continuously sync with the schedule (this allows potential changes to automatically update your calendar) you must choose either Subscribe or Manual. Download creates a one-time download that will not sync continuously. Then follow these instructions:

For Apple

If you have iCloud and multiple iOS devices that you want be synched with the same schedule, you need to subscribe through the Calendar app on your Mac and let the natural iCloud sync process transfer the calendar to your phone and other devices.

If you do not have iCloud or a Mac to synchronize everything, click the Subscribe button below from your iPhone/iPad and follow the prompts to complete the process.

For Android

As of this writing, Android phones do not natively support automatic "webcal" subscriptions. The best way to get the schedule on your Android is to subscribe to the schedule through Google Calendar on your computer (using either the Auto or Manual processes above). Once subscribed, Google Calendar will automatically synch the game schedule with your Android.

If you are not able to "Subscribe" to the schedule you wish to subscribe to, choose MANUAL and follow these tips:

Import to iPhone: Select "Settings", then "Mail, Contacts, Calendars", then "Add Account", then "Other", then "Add Subscribed Calendar". When it asks for "Server", paste the URL from step 1. It will validate the URL. Then it will give a default "Description" name, you can change this if you wish. Leave "Username" and "Password" blank. Leave "Use SSL" Off and "Remove Alarms" Off".

Google Calendar: You must log onto the PC version of Google Calendar. Sometimes you can do this on a mobile device, sometimes you can't. Once logged onto the full version of google calendar follow these steps:

In the left side bar, click the menu icon to the right of "Other Calendars" and select "Add by URL". Paste the URL from step 1 into the box and click "Add Calendar". Go back to "Other calendars" on the lower left and select Settings. Click on the calendar which starts with "webcal://..." rename it to something useful. You don't have to rename it, this is just so you can recognize it in the next step or if you need to subscribe to multiple calendars.

Once you have subscribed in Google Calendar, to get it you appear on your mobile device, follow these instructions: On your device, open your calendar, then press the 3 vertical dots on the upper right hand portion of your screen, then choose Calendars to Display, on the next screen, press the same 3 vertical dots on the upper right hand side and choose Calendars to Sync, then choose the quickscores calendar you wish to subscribe to. It may take a few minutes to show in your device. Be patient.
