Mountain View, CA 94043 to 2450  
Garcia Ave, Mountain View, CA 94043

-Key: The key to open batting cages, utility room, and dugouts is located in a lock box on the side of the roll-up door located at the rear of the shoreline building.

-The utility room: Inside the utility room is a Pony box which contains Pony bases, microphone, and audio cable.

-Batting cages: LAMV shares a pitching machine with MVLL in the left side batting cage away from the small field. Please share with MVLL. Both cages can be used if no one is in the other cage. Please don't use the cage next to the small field if a game is being played.

-Dugouts: Please lock the third base dugout when finished.

-Pitching Mound: Portable pitching mounds can be put out for each game:

Pony Division: Put the small portable mound where the front of the mound sits adjacent to the front turf area of the dirt mound. This will put the mound at 54'. Bronco mound should be set for 50' and Mustang mound for 46'.

-Audio: The microphone connection and music connection is located under the score keepers table on each field. Remember to keep music at appropriate levels to not annoy adjacent field games.
