

1 - Go to www.fvybl.com

2 - Login

3 - Enter your account info and sign in.

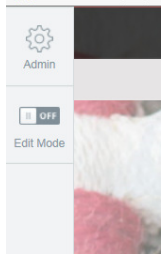

4 - Navigate to your team page

Click on "Game Schedule"

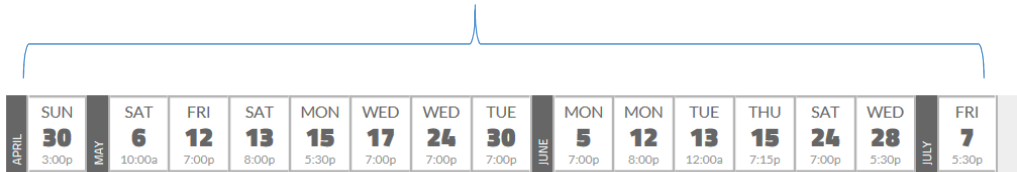

On the far Left of the screen, click on "Edit Button" to turn on your edit rights

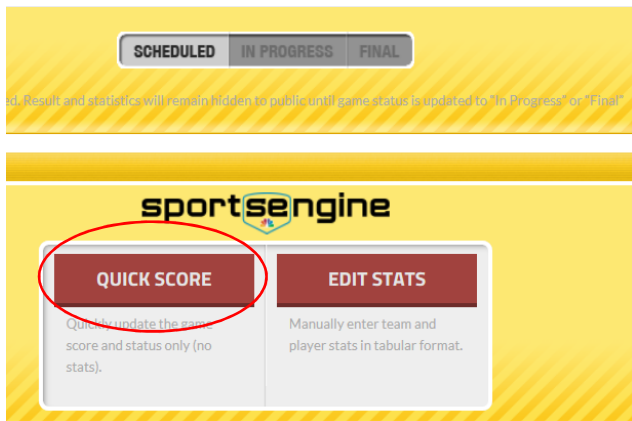

The screen will refresh and sections will turn "Yellow"

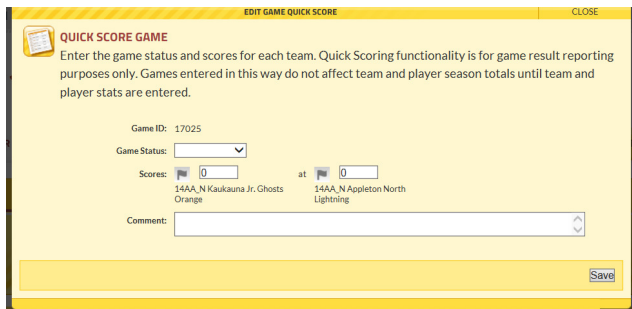

On the team Calendar navigate to the date of the game you want to score.

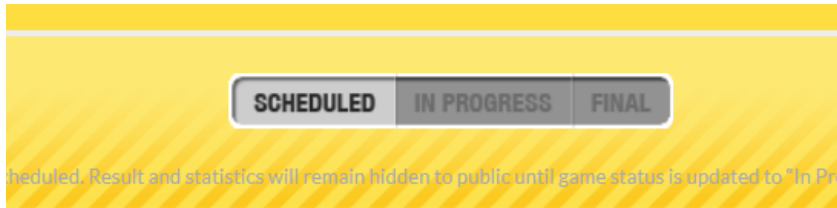

If the game does not preload, click on "QS" or Quick Score link to enter the game score results for both teams.

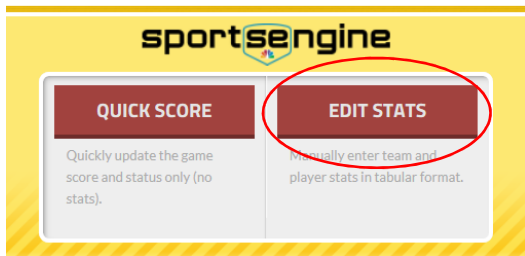

After filling in information, select Save to continue.

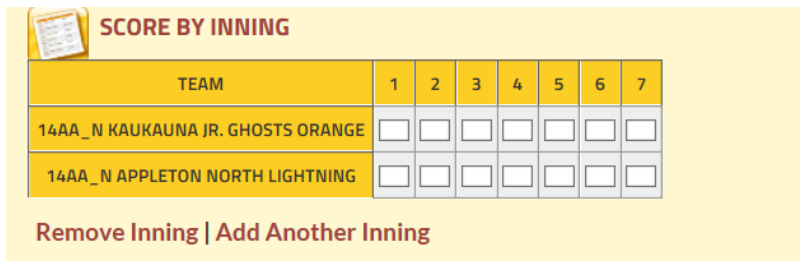

Make sure game status is set to “Scheduled” or “In Progress”. Games in “Final” status cannot be edited further.

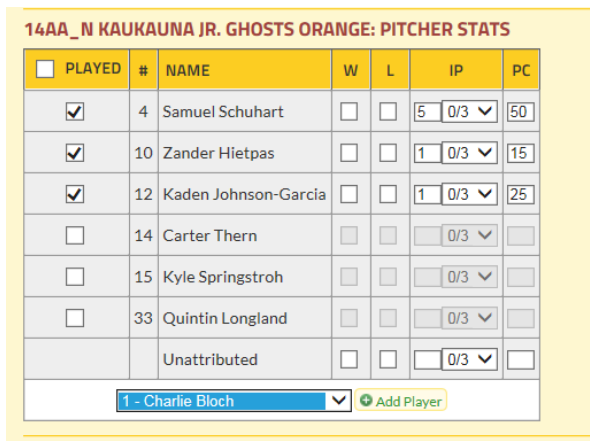

Click on “Edit Stats”

At the top of the edit window, you can add individual inning scores. If the game went into extra inning, there is an option to add innings as needed.

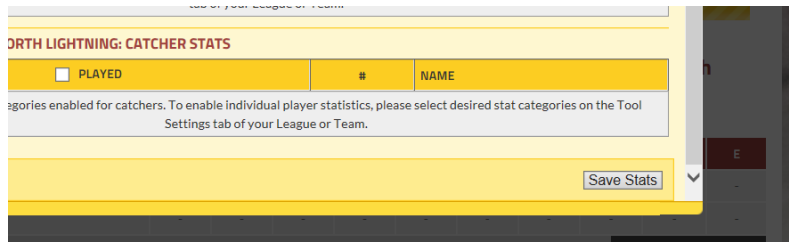

Under your team stat section of the window, select the players that pitched and add PC info as needed.

You can as much information as you want to in this section. However, the league is only concerned with the players that pitched and the total pitches thrown by that player.

It is really helpful to have all your players entered on the team page before editing this section.

Make sure to save the changes after you are complete.

The page will update and the game should reflect as “Final” status.

Repeat as needed.
