Release and Waiver

The risk of serious injury to the mouth is inherent in virtually any sport or activity that might result in trauma to the head. Therefore, it is important that a mouth guard be worn while participating in any contact related sports or activities.

As part of an educational program to encourage participants to understand the benefits of wearing a mouth guard, Orthodontics by Zirbel is either providing or recommending its use.

The wearing of a mouth guard of any kind cannot prevent injuries from occurring. However, in most cases it may help reduce the degree of severity of injuries.

I have read and understand the above information. By my signature below I release Orthodontics by Zirbel from all liability of any kind resulting from sporting injuries, including aspiration, and/or the providing of the mouth guard, and waive all claims related thereto.
