DISCOUNTED CLUB RATE

\$18.00 FOR A
FULL SET OF
PLAYER EQUIPMENT

DISCOUNTED CLUB RATE

\$28.00 FOR A
FULL SET OF
GOALIE EQUIPMENT

STOP THE UNSANITARY!!!!
Get "Simplitized" with Simply Sanitized, Ltd. ("SSL"). What is "Simplitized" you may ask. Simplitized is the catch phrase for the sanitizing and deodorizing procedure used by SSL. Does your gear stink? Those offensive odors signal the presence of harmful bacteria, including MRSA and Staphylococcal, living in your equipment. It's a major health risk! Unlike sprays that merely mask odors, SSL is an effective and affordable process that eliminates the stink at its source by killing up to 97 percent of all odor-causing bacteria with an all-natural process that takes 16 minutes to complete.

The Problem

Perspiration from strenuous activity allows bacteria to develop deep within sports equipment. The result is potentially dangerous contact with the athlete's skin and the familiar odors associated with hockey, football and other sports equipment.

The Solution

A sanitizing system designed to destroy the bacteria in sports equipment, recognizing that if you can destroy the bacteria, the odors will be eliminated.

How It Works

The SSL Simplitized system converts oxygen to ozone, which is then fogged deep into equipment fabric via dual circulating fans, resulting in the elimination of 97 percent of bacteria present. Natural tea tree oil is thereafter circulated to attack the remaining bacteria. Finally, the equipment is

sprayed with a scented bactericide to build a protective layer that will inhibit future bacterial growth and leave your gear smelling fresher.

What You Need To Know

This is NOT another fragrance or cover-up, but a scientific, biological process designed to eliminate bacteria and the resulting odors from sports equipment. The residual ozone left in the equipment has a scent that is slightly medicinal, but is not unpleasant.

The total SSL process takes 16 minutes to complete. Equipment is ready to use upon completion. There is no way to determine precisely how long the SSL treatment will last with your equipment. Individual variables such as intensity and longevity of activity will determine how often your gear should be Simplitized. Skates and gloves are the most difficult to treat.
