

OYHA PRORATED FEE POLICY

If a player joins an OYHA team after the start of the season, their fees will be prorated as follows:

The season is deemed to have five months, October to February. A player's prorated fees will be calculated based on the month in which the player first attends an OYHA practice or game. The player fee will equal the total player fee multiplied by the number of months until the end of the season, including the month of the first event, divided by five.

Example: A player at the 10U level attends their first practice on December 30. The prorated fee for this player would be \$1275 (the 10U total fee) x 3 (December, January and February) / 5 = \$765.

This policy is effective from January 9, 2018.
