How To Run The Drill	
Have pitcher throw ball to plate, catcher pops and throws. Practice having 2B or SS cover the base. Let SS and 2B communicate on who is covering. Let ball travel to you, don't reach out and get the ball. Ball travels faster. Video shows drill very good.	
Comments:	
This is a good drill to work on early in the season. Teams will be stealing right away. Don't have to have catchers throwing the ball the entire difference. You could have a coach between home plate and mound.
