

Inspiring Kids to Become LIFE CHAMPIONS!

PONYTAIL INSTRUCTIONS

Almost anyone can make a ponytail, but here is a step by step guide for a sleek, consistent ponytail that will work for straight, wavy or curly hair. To complete this look you will need a comb/brush, spray water bottle, hairspray/gel and hair ties.

1. Start with natural or flat – ironed hair
2. Comb or brush hair back to the crown of the head – you may use gel or hairspray to keep the hair smooth while doing this step (for difficult hair types, misting hair with water might be helpful)
3. Pull the hair tight and secure with a hair tie

4. Use gel or hairspray to smooth back the top and sides of the hair
5. If hair is bumpy, try using a comb to smooth out any bumps
6. The final product should be a high ponytail, near the crown of the head

7. If you are trying to achieve a straight ponytail, you may want to smooth out the ponytail with a flatiron one last time
8. Finally, mist over the entire look with hairspray!
