1 - Download the iScore for Baseball app on your mobile device.

Available for Apple or Android. For tutorials on how to use iScore to score your games visit iScore.

2 - Ensure you are connected to the internet and open the iScore app.

Select **Game Manager.**

3 - Select **Discover Game**

4 - Select the **SportsEngine** option.

NOTE: If you do not see any options on the **Find Game** screen please double check your internet connection. An internet connection is required to import games into the application.
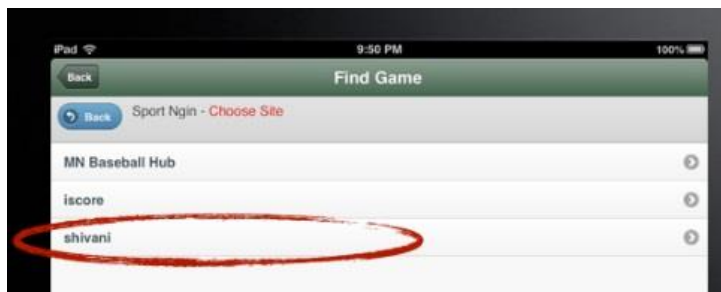

5 - Login with your SportsEngine account username and password. Internet connection required.

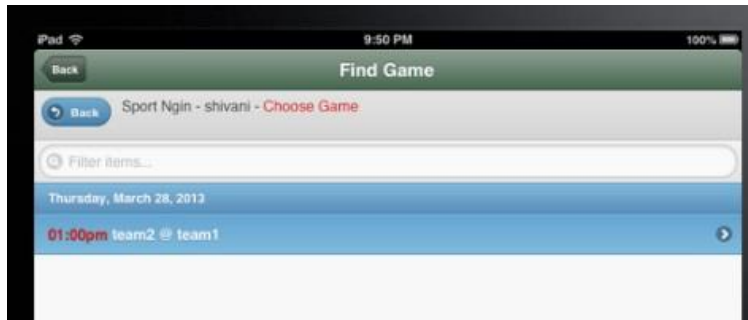

6 - Grant iScore permission to access your SportsEngine game information by selecting **Approve.**

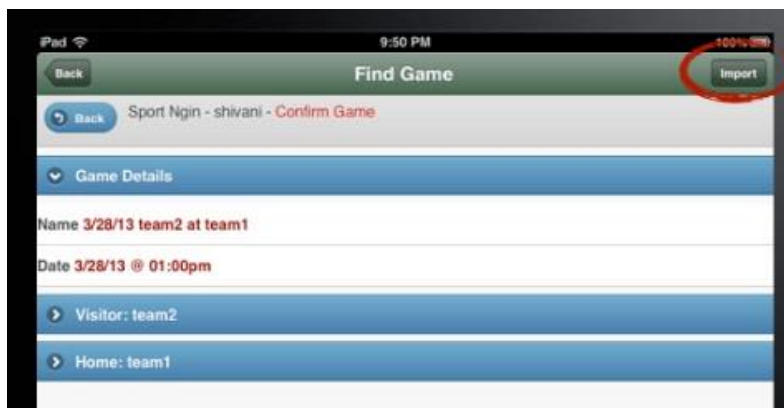

7 - Select the name of your site that you wish to pull games from.

8 - Tap the game you wish to import to view details.

9 - Once details appear select **Import** from top right to import the game into the iScore application.

10 - Select **Yes** when "confirm import" prompt appears.

11 - Select **OK** and then **Back** to return to the game manager screen.

NOTE: After this step an internet connection is not required to score the game. But if you wish to have a game cast appear in real time on your SportsEngine game page an internet connection is required. Internet will be required again when game is complete and you want to export data back to SportsEngine.

12 - On the game manager screen select the game you wish to score.

13 - You may now score the game. No internet connection required at this point.

NOTE: For tutorials and support on how to use iScore to score your baseball game please consult iScore. To sync completed game data back to SportsEngine please click here.
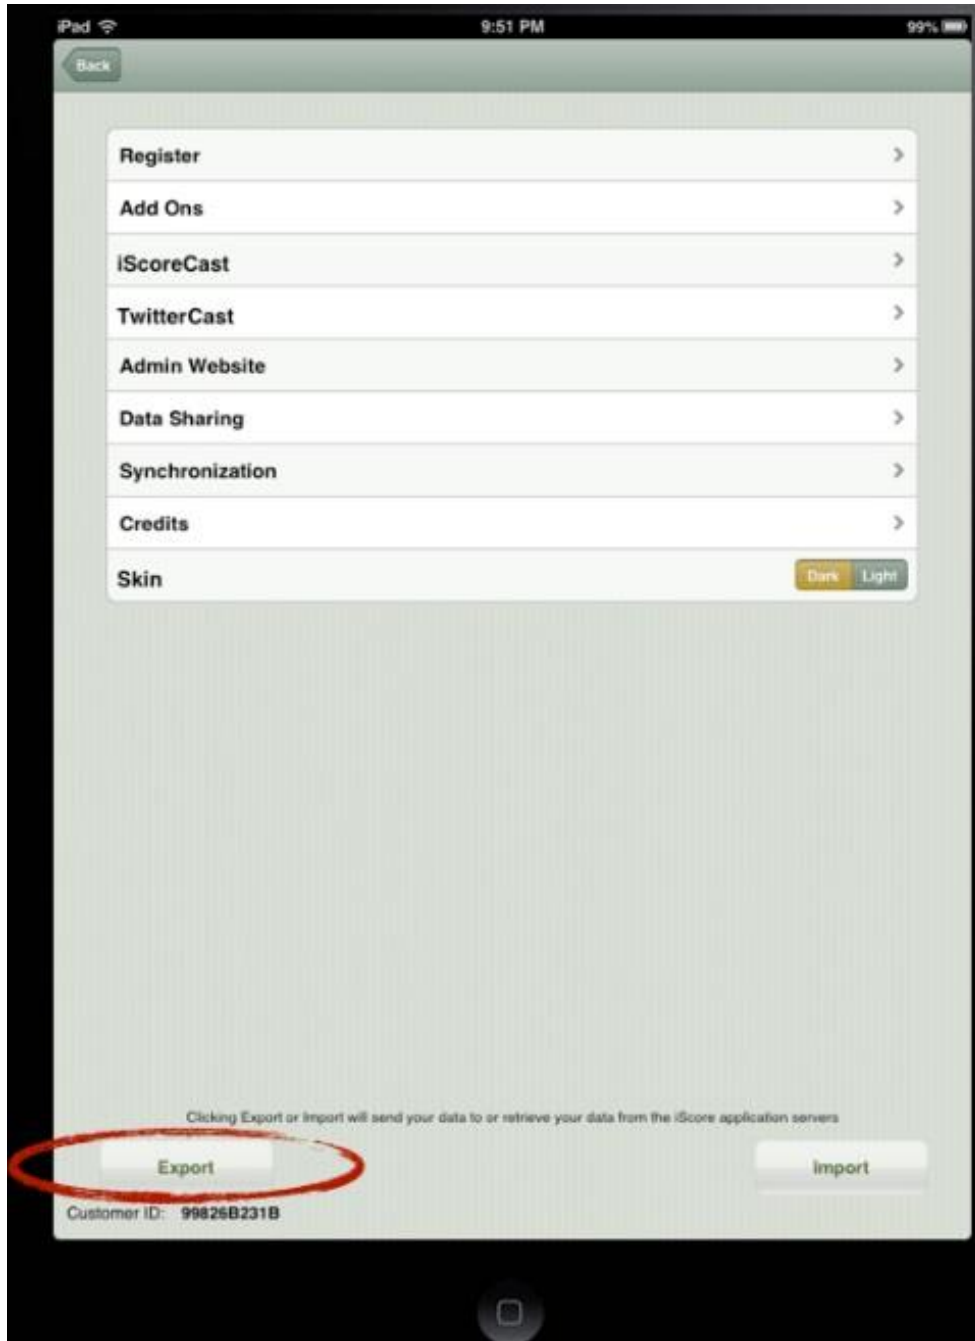

iScore for Baseball (Sync Completed Game Data)

STEP 1

Once game is scored and complete tap the **Back** button (top left) until you reach the main menu and select **Options**.
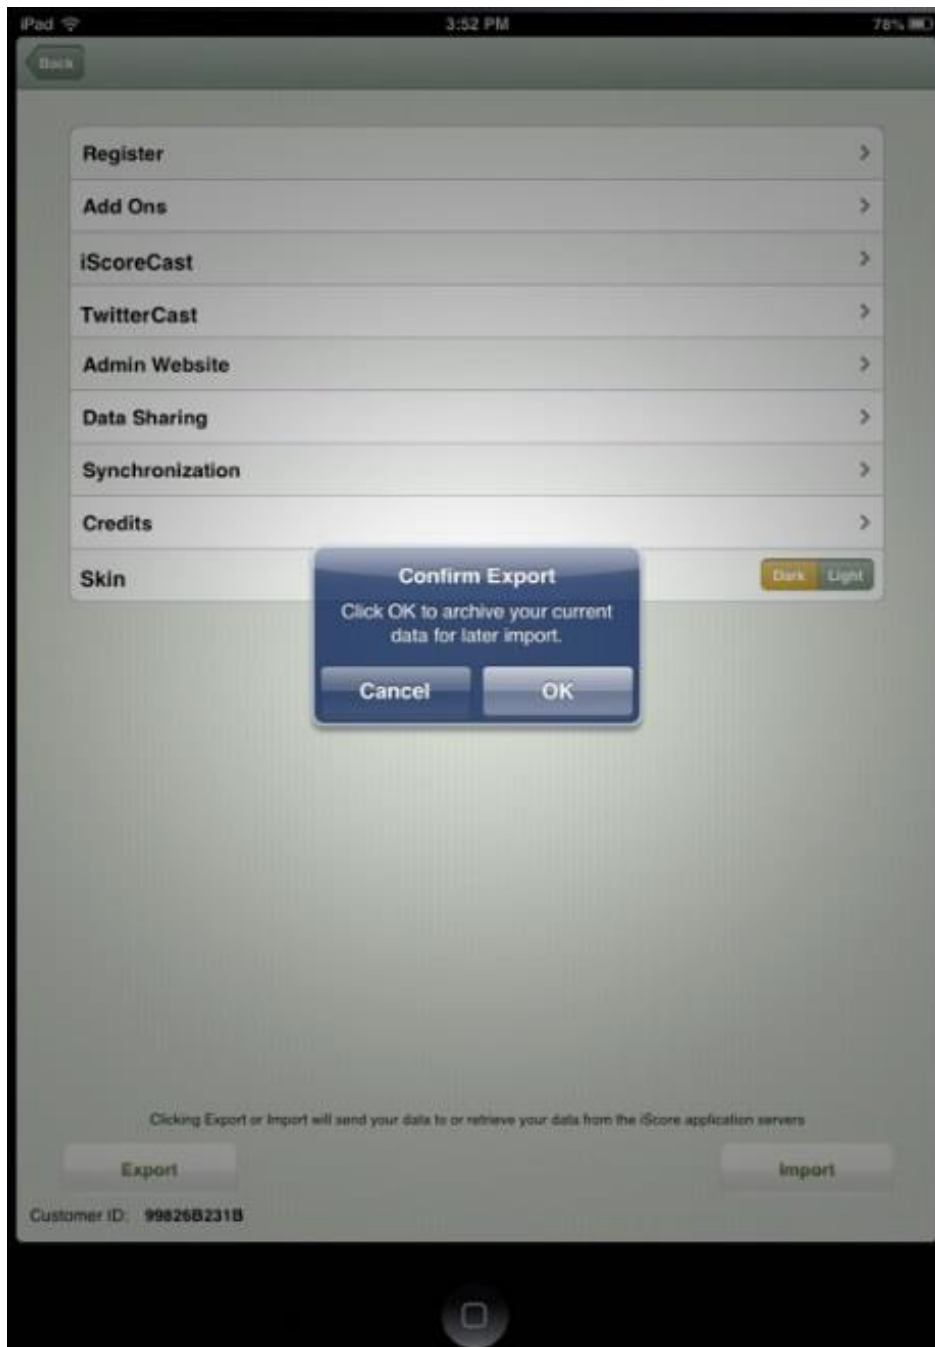

STEP 2

Select **Export** to send completed game data to SportsEngine to sync. Please note this step requires an internet connection.

STEP 3

Select **OK** to sync your game data.

STEP 4

If sync is successful you will receive a **Successful** prompt. If you receive an "Unsuccessful" warning please double-check your internet connection.
