

Alpha Gymnastics COVID-19 Response

Alpha Gymnastics has always taken great pride in the cleanliness of the gym. Procedures and a cleaning schedule for each part of the gym had already been established and practiced before COVID 19. We have added additional methods to mitigate infection and increase the sterilization of our facility to keep students, parents, and our staff as safe as possible.

Office

The forward area of our facility, including the office, bathroom, and mezzanine (viewing area) are maintained, cleaned, and sanitized throughout the day. We mop all the floors, wipe down the walls, sanitize the railings, and disinfect surfaces.

The cubby and lockers, and drinking fountains are currently closed for safety. During regular operations, we sanitized drinking fountains several times a day.

We sanitize the bathrooms, including the walls, floors, toilets, sinks, and mirrors. The receptacles are wiped down and cleaned, then sprayed with disinfectant. Each bathroom has hands free devices for soap and paper towel dispensers. We sanitize the diaper changing table. Liners are available, and we recommended them when using the changing table for your little ones.

Bathroom Use

Currently, the bathrooms may only be used for washing hands and going to the bathroom. No changing of attire is allowed. Please come dressed and prepared for the gym. In the women's restroom, we permit only three at a time, and two at a time in the men's restroom. A toddler and the parent will count as one individual. Medals are hanging outside of the bathrooms, and when someone enters, they take a medal. If there are no medals available, please wait for someone to come out. The medals are cleaned and disinfected during the day. Hand towels are available to pick up the medals.

Mezzanine and Viewing Areas

We have marked the viewing area for social distance, and only 12 will be allowed to view at a time. Please only sit in the chairs that are free of caution tape, and we permit only one person per table. All tables and chairs are cleaned, sanitized, and disinfected each day, and we vacuum the carpet daily. Under the current rules, we ask that siblings not be brought to the gym and only one parent per family.

Office & Half-Wall Area

Throughout the office and the half-wall, bright green marks on the floors indicate the 6-foot distance. Please use the marks on the floor to maintain social distance while entering and exiting. Parents should not stand to visit in this area. Keeping this area clear is essential for social distance and allows participants to use the bathroom without contact.

In the office, we have installed sneeze shields to protect those who work at the desk. We request that everyone who enters the gym use hand sanitizer. There are four hand sanitizer stations with directions. Additionally, an air scrubber was added to the office to help maintain clean air. It is located to the left of the black table as you enter.

There are signs when entering the facility and posted on the wall for general information about COVID 19, the symptoms of COVID, and directions for handwashing and the use of sanitizer. Signs printed in both English and Russian. If you are ill or have been exposed to anyone with symptoms, please do not come to the gym.

Temperatures

Each person who enters the facility must have their temperature taken and be cleared to enter. We will ask anyone with a temperature of 100° F or 37.2 C to go home.

Waivers

As you enter the facility and before participating in class, a waiver must be signed. The waiver is available on our website, or you may sign as you enter. **Please remember this must be done each time you enter the gym.** Pens are in cups, and one is marked new, and the other used. When you use a pen, please put it in the used cup.

For your safety and convenience, alcohol wipes have been placed by the front desk computer and vending machine so that you may wipe surfaces before touching. These are cleaned daily, but it is challenging to do this between each use, so we provide alcohol prep pads.

Cubby Area

The cubbies are closed at this time and we ask that you please bring a cinch sack or backpack to put in personal items. Please include a water bottle. The backpack or cinch will remain and rotate with the student while in class. Shoes should be in the bag. Please do not leave shoes on the floor.

What to bring?

- Backpack or cinch sack for all personal items. We will provide a plastic bag for recreational students who forget to bring something to put belongings. Please do not leave shoes by the half wall; they should be in the bag. All personal items must be stored and taken with participants or left with parents.
- Water bottle filled and labeled with a name. (must be kept in backpack or cinch sack) If you forget, water bottles are available for purchase at the front desk or in the vending machine.
- Personal wipes and hand sanitizer

Shoes and any extra clothing should be in the sack or backpack throughout the class. Please label all personal belonging. ***Under the current phase, we can not maintain a lost and found, and any items left at the gym will be thrown away.***

Mask Policy

All who enter the facility must be wearing a mask upon entering. If you forgot your mask, we have them available for \$1.00. Anyone 4 and under do not have to wear a mask. The following are mask protocols that must be followed:

- Students
 - Please enter and exit gym wearing a mask
 - Masks do not need to be worn during class

- Parents/Customers-please always wear a mask:
 - You enter the facility
 - You are speaking to someone at the front desk
 - You are talking to a coach
 - You are within 6 ft. of another person
 - You are assisting your child on the gymnastics floor (parent-tot classes)
- Coaches
 - You enter and exit the facility
 - You are within 6 ft. of a student
 - You are speaking to a parent/guardian
 - You are spotting an athlete

Entering the Gym for Class

We have rescheduled all classes to provide extra time for all to enter and exit and maintain social distance. When students are entering the class, parents must take personal items, or they must be in your backpack or cinch sack or a plastic bag. Coaches will lead the class out to the floor using a bright green rope that is marked with knots every 6 ft. The gym is marked to help students maintain a 6-foot distance. Coaches will help students learn and maintain social distance during class

Gym Set-up

The gym has been marked with lines, and “X” marks to make it easier for students and coaches to know where 6 ft or 2 m are to maintain social distance. Ropes with knots every 6 ft were made for younger classes to maintain social distance while rotating during class. Around the gym, there are ten hand sanitation stations so that students’ clean hands before touching equipment. Before using bars, students apply liquid chalk to sanitize hands and keep the bars sanitized.

All mats, surfaces, and tools used during class are cleaned in between rotations and classes. The bars are cleaned with liquid chalk (Liquid chalk is made with rubbing alcohol and sanitizes). Beam surfaces are cleaned each evening with Truce, and it also has rubbing alcohol as an ingredient. The garage doors are opened for additional ventilation unless we need to maintain the temperature in the gym.

Classes

Currently, during this phase, the gym is open, and we operate below 25% occupancy and limit the number of classes per hour and class size to maintain social distance.

Make-up Classes

During this time, we have changed our make-up policy so that you may schedule as many make-ups as needed during the month. You must be currently enrolled in a class to schedule make-up classes. These must be prescheduled with the front desk or via email with a confirmation to maintain class size.

We hope that this information is helpful and informs you that at Alpha Gymnastics, the safety of all students, parents, and staff is essential.
