Never played? Here's how it works:

There are 100 squares available. Purchase as many squares as you like. When all squares are sold, owners' names will be placed on the board randomly. The numbers 0-9 will then be positioned along the top and the side, also randomly. The completed board will be posted at www.euclidbaseball.com. Then just watch the games to see if you win! Payouts occur when the tournament has ended.

The last digit in both teams' scores at the end of the game will determine the winning squares. In basketball, there are no "bad numbers" so every square is good!
