E-BIKE SHARE TO RETURN FOR THE THIRD SUMMER

There are so many things you could do on an e-bike that will make life so much more fun! An adventure is out there, anywhere in Vail and an e-bike awaits you!

E-bike program was created to contribute to the town's Climate Action Plan goals of reducing emissions from transportation. The regional e-bike share between Vail, Eagle-Vail, Avon and Edwards is returning in the springs for its third year.

An audit by the U.S. Postal Service Office of Inspector General found residents of Colorado mountain towns experienced significantly lower on-time performance than the rest of the state and country.

The audit published Tuesday, Dec. 5, by the U.S. Postal Service's Office of Inspector General was initiated after customers, local leaders and lawmakers have called attention to postal issues across the Western Slope in recent years.

The issues with customers receiving their mail on time grew so acute in some mountain towns last winter that several local governments publicly discussed legal action against the U.S. Postal Service. Some residents at the time reported issues accessing medications and important bills through the mail since packages and letters would show up weeks or months late.

The audit identifies hiring and retention of employees to be the biggest challenge for the U.S. Postal Service facilities in Colorado mountain towns. A lack of management oversight, communication and insufficiently trained postmasters also contributed, in part, to the lower service performance and customer service, according to the audit. Currently, Vail Run typically receives mail only 4 days a week, and generally between 4:30 and 7:00PM. We often receive mail that does not belong to Vail Run or business in the building, we suspect some of our mail goes elsewhere. We just learned our current temporary carrier is headed to California next week.

HOPE TO SEE YOU THIS SUMMER
