

2020

Award of Merit

Sean Gavigan

Sean founded Prime Time Timing in 2003. He developed this full-service event and race management company that has provided customized timing solutions for sporting events including track and field. His goal was to apply the latest in sports timing technology to all levels of events.

Sean has worked with over 200 Wisconsin High Schools and their track coaching staffs to bring them the best in timing and meet management. Prime Time Timing has been the exclusive registration and meet management tool used by the WIAA for all Regional and Sectional meets since 2007, and has been the timing system used for the State Meet since 2009. This technology has elevated the smooth operation of our State Meet.

The Wisconsin Track Coaches Association and all members are grateful and appreciative for the quality of service and expertise you have provided to the sport of track and field in Wisconsin.

Congratulations

The Wisconsin Track Coaches Association
