

HOW MUCH DO YOU THINK YOUR SHOT WOULD IMPROVE IF YOU TOOK 5000 SHOTS WHILE COVID-19 KEEPS US OFF THE ICE?

GOAL: Increase shot speed, quickness and accuracy

PLAN: Shoot 5000 pucks while we are off the ice due to the international Covid-19 crisis
DAILY GOAL: 250-500 shots per day

WRIST SHOT

The Wrist Shot is a valuable tool for players of all ages. This is the most accurate shot in hockey as the puck is in contact with the stick throughout the shooting motion.

BACKHAND SHOT

The Backhand Shot is maybe the most difficult for a goalie to save, and probably the most difficult to master.

SNAP SHOT

The Snap Shot is quicker than a wrist shot and more accurate than a Slap Shot. It's probably the most widely used shot in hockey today. The most important attribute of a good snap shot is the speed with which you can release the puck.

WRIST SHOT BALANCING ON ONE FOOT

Seldom is a player in the perfect position for a shot on goal, this drill works on proper technique while in an off-balanced position.

DRAG & SHOOT

The ability to shoot the puck in various situations that arise during a hockey game is an invaluable skill. The Drag & Shoot drill provides a game-like situation that includes a set-up move prior to the shot changing the angle of the shot and creating more speed on the shot.

SLAP SHOT

Timing and proper technique are the foundation of mastering a powerful Slap Shot. Of all the shots in hockey, the Slap shot has the most speed and power.

STICK HANDLE & QUICK RELEASE

Quickness often trumps power when it comes to generating quality scoring chances. Whether in traffic or off the rush not giving the goalie a chance to get into their set position is key.

ONE TIMER BONUS

A difficult skill to master, but one well worth practicing, the one-timer slap shot can be executed while stationary, or in motion. Again as with any one-time shot, timing is the key.
