PITCH BREAKDOWNS - FASTBALL

All data points shown are averages unless otherwise specified.

Count	Velo	Max. Velo	Max. RPM	True Spin	Spin Eff.%	Gyro Deg.	VB	HB	R. Height	R. Side	R. Angle	H. Angle
11	78.2	80.2	1677	1662	99.0%	-2.0	7.1	11.4	4.7	0.8	0.3	-2.4

PERFORMANCE TRACKING - FB

Plots will only be shown for pitches that recorded data.

STRIKE ZONE HEATMAP - FB

**RELEASE HEIGHT**

---

Vertical height above the ground at the point the pitch is released.

**RELEASE SIDE**

---

The distance from the center of the rubber at the point of release from the pitcher's POV where the right is a positive number and the left is a negative number.

**RELEASE ANGLE**

---

Vertical angle of the ball leaving the pitchers hand where up is positive (higher pitches or pitches with a large amount of negative vertical movement) and a downward angle being negative (pitches lower in the zone or traditionally higher positive vertical break).

**HORIZONTAL ANGLE**

---

The Directional degree when the ball leaves the pitchers hand where to the left is negative and the right is positive from the Pitcher's POV. Traditionally, all RH P's have a negative angle and LHP's have a positive angle to varying degrees.

**STRIKE ZONE BREAKDOWN**

---

**Heart of Plate:** Batter wants to Swing, pitcher wants him to Take

**Shadow Zone:** 50/50 on pitch called either way

**Chase Region:** Batter wants to Take, pitcher wants the Swing

**Waste Area:** 1+ foot off edge of strike zone
