ESTO RETRACTABLE LLC
Maximizing Venue Utilization

OFFICIAL RETRACTABLE MOUND SUPPLIER

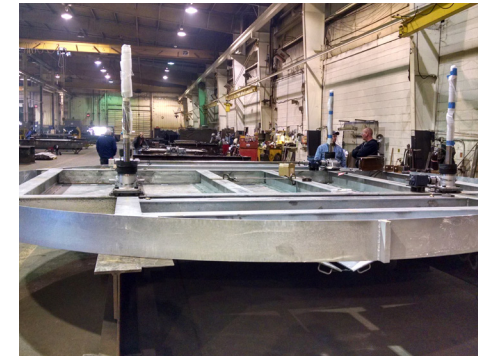

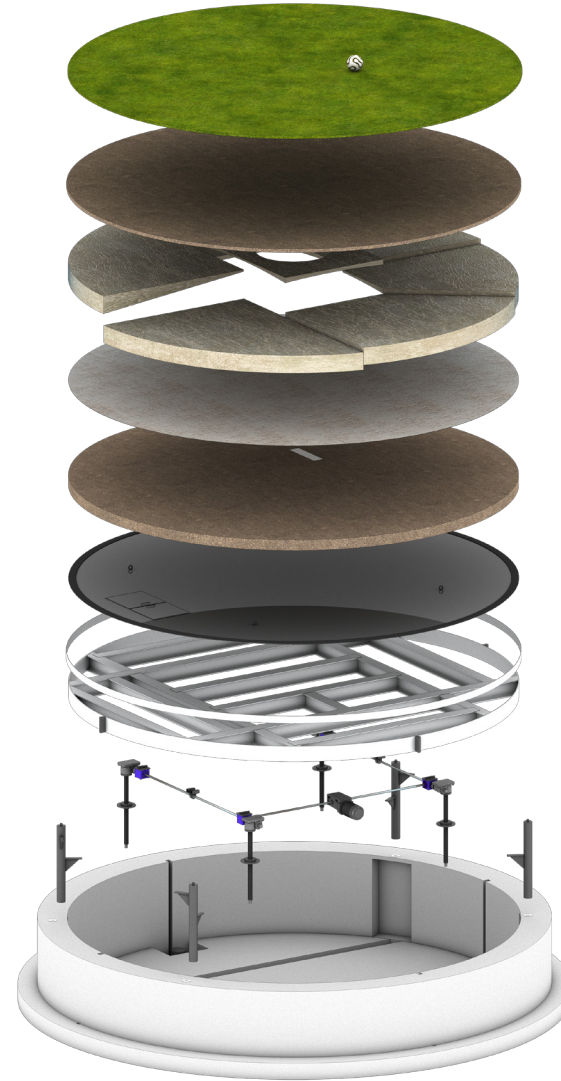

As venues and stadium management look to expand their stadium utilization – without building new stadiums – creating a multi-purpose venue is critical to scheduling soccer, concerts, lacrosse, rugby, and other activities. Field conversion is a scheduling challenge when a pitcher's mound is involved. To manually remove a pitching mound and rebuild it after a non-baseball event takes expensive materials and labor. Esto Retractable offers a patented design for a Retractable Pitching Mound to allow field conversion in two hours – allowing you to play baseball in the morning and play soccer that same evening. Transforming stadiums in hours – not days – is the key.

Esto Retractable offers licensing agreements for each installation, providing design documents, outline specifications, and consultation to expedite the engineering of your retractable mound.

CLIENTS/EXPERIENCE:

The prototype retractable mound was installed at Louisville Slugger Field in 2015 and has provided 100% reliability, ease of operations and low maintenance performance.

WEBSITE: www.estoretractable.com

The 3D illustration below shows the components of the retractable mound. A video of the components as well as the conversion at W can be viewed at www.estoretractable.com

OFFICIAL STADIUM RESTORATION SUPPLIER

Almost all stadiums are made up of reinforced concrete with steel seating supports, railings and sometimes with wooden bench seats. Unfortunately, an even more universal characteristic is their openness and vulnerability to the elements — in addition to the expected beating provided by fans. All these forces combine and take their toll on the structural integrity of each stadium. Fortunately, Western specialists can accurately analyze the type and extent of the damage, recommend cost-effective remedial measures, consider the use of cutting-edge, long-wearing materials and submit a realistic project estimate to get your stadium back on its feet (and your fans back on theirs).

Stadium restoration services include:

- Concrete Restoration
- Above and Below Grade Waterproofing
- Sealant/Caulk Replacement
- Pedestrian and Vehicular Traffic Coatings
- Structural Masonry Repair
- Expansion Joint Replacement

OFFICIAL MATCH BALL SUPPLIER

Founded in 1947 by Danish national team player Eigin Nielsen, SELECT has been an innovator on the pitch since its early days. SELECT match balls were the first to be produced with no outside cord, which allowed the ball to better retain its shape, and later was the first manufacturer to introduce the 32-panel design, which is now the standard for soccer balls around the world. SELECT's hand-stitched footballs and handballs retain their perfect balance, touch, bounce and flight for thousands of hours, even with severe pitch and weather conditions.

For about 70 years, SELECT has only used the best leather and (later on) the best synthetic materials for their hand-stitched balls. They also offer the most comprehensive quality warranties in the industry. To ensure that all SELECT balls live up to their quality requirements, they are thoroughly inspected at their production site in Pakistan, followed by another inspection in Denmark on their top balls. They inspect the stitching, surface, sphericity, circumference, weight, airtightness, and printing inks before they deliver their products. They even pump up the bladders they produce to ensure the perfect balance. SELECT's quality standards are the highest in the industry, even higher than those of FIFA when it comes to the best match balls. They guarantee the quality of their balls and offer the best warranties in the industry: a three year warranty for stitching and shape for their Pro Series balls and a two year warranty for their Club Series balls.

OFFICIAL SPONSORSHIP MANAGEMENT PLATFORM

Trak provides collaboration and visibility throughout the life of your corporate partnerships, so you always have access to the information you need, exactly when you need it.

It helps accelerate and simplify sponsorship management; so sponsorships are pitched with the correct inventory, executed with the correct artwork, involve the correct people, and every inventory item is maximized to grow partnership revenue.

By having one central location, we give everyone time back to strategically build, plan and THEN activate their partnerships instead of getting bogged down with complex partnerships (which is what all sponsors want) because their disjointed rows and columns (excel anyone?) and inefficient processes (more meetings phone calls and emails) can't handle the volume of exchanges required to pull them off.

CLIENTS/EXPERIENCE:

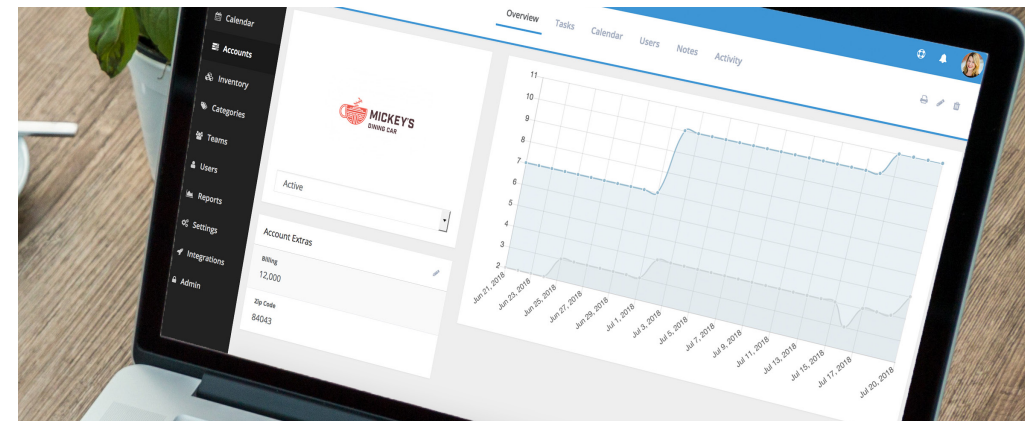

United Soccer League
North Carolina FC
DC United
Sporting KC

Baltimore Ravens
San Francisco Giants
Detroit Red Wings
Monumental Sports & Entertainment

"Trak has allowed us to completely streamline our partnership fulfillment plans. We not only use it to organize assets and deliverables before the season, but also for proof of performance throughout the year. It has made us more efficient and proactive with our partners which they very much appreciate."

Director - Marketing and Partnership Activation
