### Symptom Screening and Getting Sick:

- If you are sick or feel sick, please do not attend any CASA session or game. If an individual indicates that they're experiencing COVID-19 related symptoms or have been exposed to an individual with confirmed COVID-19, they will not be permitted to participate. If a player becomes sick during the session, they will be taken off the field, evaluated by a staff member on site, and likely be sent home.
- Players, parents, and staff should self-report to CASA personnel if they have tested positive for COVID-19 or have been exposed to an individual with COVID-19 in the previous 14 days.
- Players (or parents of players) must notify the club and their respective coach should they become diagnosed as COVID-19 positive.
- Players and coaches diagnosed with COVID-19 must quarantine for 14 days as required by CDC/PA Department of Health. They may return after 10 days since symptom onset **and** at least 24 hours have passed since resolution of fever without the use of fever-reducing medications **and** other symptoms have improved.
- For any player or coach who is considered a close contact (within 6 feet of someone for a cumulative total of 15 minutes or more over a 24-hour period) with someone who has COVID-19, they must quarantine and are not permitted to participate in any club activity, including practices and games, for 10 days following their last known contact with the COVID-19 positive individual. Exemptions to this include:
  - Players and coaches who are fully vaccinated do NOT need to quarantine after contact with someone who had COVID-19, unless they themselves have symptoms (fever, cough, shortness of breath, or [other symptoms](#) of COVID-19).
  - Players and coaches may return to activities after day 7 if they receive a negative test result. The negative result must occur on day 5 or later from last known contact of COVID-19 positive individual.

All players, their families, and staff should self-report if they have been diagnosed with COVID-19. If CASA becomes aware of an exposure within the group, a communication will be sent to any individuals who may have had close contact with the infected individual. Privacy will be protected, and no identifying information will be shared within the communication. Additionally, the activity of the group to which the infected individual belonged may be suspended.

### At Risk Individuals:

If your child is part of a high-risk group (has a pre-existing medical condition including chronic lung disease, moderate to severe asthma, serious heart conditions, immunodeficiency, diabetes, chronic kidney disease, or liver disease), you should consult with your family physician before attending any CASA session.
