EVOLUTION NOT REVOLUTION

JOINT STATEMENT

We are pleased to announce that effective in the Fall 2020 **FC Evolution**, a unified soccer organization consisting of four founding members, Cleveland Futbol Club (Royal), Everest Soccer Club (Green), Mahoning Valley Soccer Club (Red) and Pennine United Soccer Club (Burgandy) will commence operations to provide a wide range of opportunities at ALL levels of competition for ALL of our families.

The rules at the National, Regional and State level are constantly changing and our individual club directors/owners have concluded that as a unified organization, we can effectively meet those changes and challenges together – some of those collaborations are ongoing as we speak to start the process where needed.

A big factor in this unification is that we can now support all of our families' individual soccer goals, whether at the National, Regional or Statewide premier soccer levels. If your dreams are to play professionally, in college or in high school, we can provide multiple options to best fit your family.

The result of the limited collaboration to date has convinced us that the support system from each other will consolidate, strengthen and grow our program.

Collectively, our four founding members currently consist of 4 National League teams, 37 Regional League teams and 38 State League level teams, and the MAJORITY of those teams will stay intact.

We are comfortable with our unification because we are keeping all our club staff involved with the teams they currently work with. The coaching/player/parent relationship is as vital to our clubs as well as to our families.

Finally, take a minute to digest this information. Nothing really changes. Parents and players will continue to find the best place for them to play. Our experienced directors feel we can provide one of the highest, most competitive clubs in the country, while having enough staff to focus on the process of player development at every level. It is important to us that your son or daughter enjoy the sport!
