## More Opportunities For DinoMights' Students

DinoMights' Billy Lindsay Refrigerated Outdoor Rink Expands Opportunities on and off the Ice.

Over the past 11 years, DinoMights has proudly operated an outdoor rink within the community we serve. Now entering our fourth year with a refrigerated rink, this space has become an important resource for our kids. Having a rink in our own neighborhood gives them the opportunity to develop their skills independently, spend more time on the ice, and build stronger connections with their teammates. The rink also creates employment opportunities for our high school DinoMights, many of whom are experiencing their first job.

**“Skating with friends and having a place to warmup.”**

Special thanks to the Lindsay Family. Thank you to our incredible donors who made our outdoor rink possible, and to the dedicated volunteers who help with setup and tear-down each season. Your support goes a long way and plays a vital role in the growth and development of both our DinoMights' students and the program as a whole.

**“My favorite part about skating at the outdoor rink is growing my chemistry with my teammates.”**
