Why is this a fantastic community soccer family?

As part of the community's soccer development pathway, the **Classics Eagles Soccer Club** provides players the chance to challenge themselves with and against players of similar skills and interest in competitive soccer. The volunteer coaches guide and nurture players through the developmental process with technical, tactical, and administrative support from the Classics Eagles Professional staff. The training and game experiences are designed to be safe, challenging, and rewarding. From start to finish, the volunteer coaches are supported by the club's full-time leadership team and provide resources necessary to help each player develop and enjoy the game.

How does my child become part of the Classics Eagles family?

Classics Eagles accepts teams and individual players into the program. Classics Eagles provides the opportunity for teams and friends to stay together to play at a competitive level beyond a recreational program. If an individual player is looking to come into the program, we will try to place the player on an existing team or create a new team of individual players who are searching for a team. We make every attempt to find a place for every player looking for a team. Team and individual player registration information can be found on the Classics Eagles website.
