## **Skills Night Experiment**

Discussion on how everyone liked having all the squirts in one building and all mites in the other building for skills night. Feedback was overall positive. We did have some parents express concern on the difficulty on getting both a squirt and mite to 2 different buildings. Another complaint was not enough communication to the parents nor was it early enough. Mooney stated that the calendar was already set to continue to run this way through the rest of year.

Possibly next year, run 1 month separate and then all groups in one building.

## **Discuss Issues-**

Mitch relayed information that he received about a Riverlakes 12u coach that made an inappropriate comment in the handshake line to an opposing player.
