Things to keep in mind

Program Purpose:

- Spring Development is designed to help each athlete push themselves, build strength and speed, and develop the self-discipline needed to prepare for the upcoming season.

Training Expectations:

- Coaches will lead scheduled dryland training sessions each week to teach proper technique, intent, and execution.
- Athletes are responsible for completing the remaining workouts and active recovery on their own time.

Strength Training Guidelines:

- Track your weights each week by filling in the orange columns.
- If you are able to complete all reps with good form and minimal struggle, increase the weight on the next set.
- At the start of each new week, begin with the weight you finished with the previous week, and continue to progress if you are able.
- Focus on quality of movement first, then increase weight.

Conditioning Guidelines:

- All conditioning should be done using interval training.
- Recommended work:rest ratios range from 1:1 to 1:5 depending on the workout. (i.e., work for 1 min, rest for 3 mins)
