

2022 NWHL Tournament Tiering

For the NWHL tournament each team is tiered for proper placement and the most balanced competition. Once all values have been assigned to the first and second round of play, teams are ranked from top to bottom then placed into brackets.

First and Second round of play values are as follows:

- First Round (6 games) = 100% full value
- Second Round (12 games):
 - Division 1 (Red) = 100%
 - Division 2 (White) = 85%
 - Division 3 (Blue) = 70%
 - Division 4 (Yellow) = 55%

The points from the first and second round of play are added then teams are ranked from top to bottom.

In case of tie in points we go to fewest Goals Against. If there is still a tie, the team from the original higher bracket will be placed up. No team should move more than TWO levels up or down whenever possible. NWHL Rules will be adhered to for tiering and team placement
