SCOUT BOOK

TROY, MI – November 26, 2025 – Following the success of September 2025’s Tier I Showcase, MAHA will return to Buffalo Wild Wings Arena in Troy, MI to present the Tier I December Showcase on December 5-7, 2025.

Once again, the showcase event highlights National-bound teams (14U – 18U) from all of Michigan’s Tier I (AAA) organizations. Teams from each age division will compete in a three-game schedule over the course of the weekend, occupying all rinks at Buffalo Wild Wings Arena.

While the teams and host location may be the same, MAHA Hockey Events Manager Jon Hosking suggests that the presentation is expected to be a bit different this time around.

“The September showcase brings all of the excitement of the start of a new season, but the December showcase is a little different,” Hosking explains. “All of these participating teams are battle-tested at this point in the season, and they’re quickly approaching the turn of a new year which leads to their post-season run. I think team personnel begins to pay closer attention to how the competition is forming because they know that the State tournament is just around the corner.”

The September 2025 event was one of the most highly-viewed MAHA Tier I Showcases in recent years, both in-person and online. Whether spectators choose to partake in the action live, or via livestream, MAHA leadership expects a similar following in December.

“We’re extremely pleased with the attention that our Tier I Showcases have garnered,” stated Jason Reynolds, MAHA Director of Operations & Marketing. “In September, there’s a significant increase in foot traffic within the walls of Buffalo Wild Wings Arena. December is a little different, as it tends to be a busier time of the season. That said, whether they’re in the building or on the road, coaches, scouts & family members will have the convenience of livestreaming to ensure that they don’t miss out on any of the weekend matchups.”

Games will be streamed online by MiHockey.TV – single game and full showcase packages will be made available for live streaming.
