

Overtime Format

- Overtime will take place with each team receiving a possession
- Coin flip determines choice of 1st or 2nd possession
- Possession begins at the 10 yard line (both teams will go in the same direction)
- If a touchdown is scored, a team can elect to go for a 1 or 2 point conversion
- If the defense intercepts the ball it's a change of possession starting at the 10 yard line unless the defense returns it for a TD. Game could be over if the intercepting team was ahead in points in OT prior to playing defense or the intercepting team returns it for a TD on its first defensive possession per OT
- If the game is still tied, overtime will be repeated until there is a winner
- Offensive team will get 2 downs to score from the +10 yard line
- Teams alternate first possession each overtime period
