

# ImPACT Test Instructions

ImPACT is a computer based concussion screening tool used to help assess the cognitive functions of the brain. It is a tool that is used to aid physicians and athletic trainers in determining the appropriate treatment protocols necessary in the event of a concussion. An initial “baseline” must be documented in order to accurately aid in assessment and treatment. This initial exam will assess your baseline score.

The exam will take approximately 30 minutes to complete. Take the exam in a quiet room with all distractions removed. The use of cell phones, tablets, etc. is prohibited during the exam. It is important that you take the exam seriously and remove all distractions. A computer with a high speed internet connection must be used. Please select if you are using a Touchpad or an external mouse.
