On Ice Evaluation

SFYHA Rating Scale (Relative to peers on ice)

1. Insufficient (Plays below age and level)
2. Concerning (Needs more attention and time)
3. Manageable (Acceptable/Present)
4. Sufficient (Meets standard of age-specific skills/concepts)

Functional Intelligence	Heading into Bantams next year, there needs to be a significant improvement of seeing and playing the game of hockey in games. When the pressure was on this season in difficult high speed games, the tunnel visions, unforced errors, and crucial mistakes became a problem. I'd like to see you next year ramp up your intensity in practices so that in games, when the intensity is high, you're more comfortable.
2 - Concerning (Needs more attention and time)	
Competitive Spirit	[REDACTED] you're a great team player on and off the ice. Consistently wanted to be in positions to win, you often showed the effort necessary to accomplish those goals.
3 - Manageable (Acceptable/Present)	
Puck Management Skills	[REDACTED] shot, puck movement and overall puck management are all very good. Capable of sniping from the defensive position, great angles on defense, overall when you're comfortable you excelled.
3 - Manageable (Acceptable/Present)	
Speed Skills	Physically on skates you're quick, show great athleticism on the ice. The speed of your decision making became concerning when the competition got intense.
3 - Manageable (Acceptable/Present)	
Discipline Skills	[REDACTED] in games this was an issue all season long. 19 penalties this season including 7 in the last 10 games. Next year checking is allowed, but how many of those 19 were checking penalties? The whole team only had a few.
2 - Concerning (Needs more attention and time)	
Cumulative Rating	2.6
