How to Print a Scoresheet: 2021-22 Season
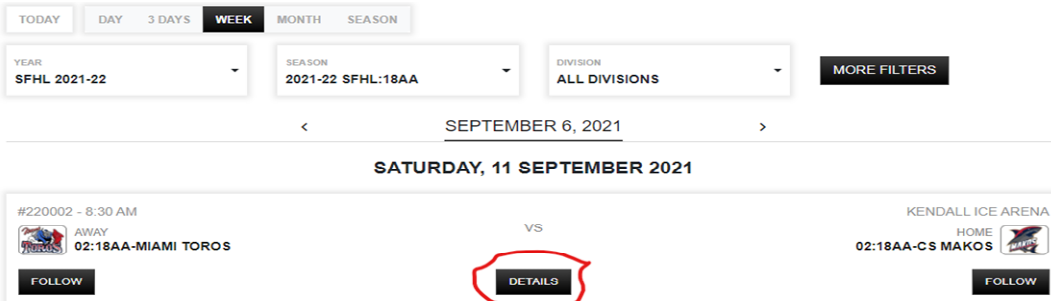

1. Go to SFHLHockey.com
2. From the top horizontal menu, click on SCHEDULE.

3. Scroll down and **WEEK** is pre-selected. You can change that to fit your needs. The <u>Year</u> should be **SFHL 2021-22** and under <u>Season</u>, select the League you want to print a scoresheet for. You can also click on **MORE FILTERS** if you want t o filter by Rink or by Team.

4. The schedule will populate. Scroll to the game you want. In the middle is a button that says **DETAILS**. Click on **DETAILS**.

5. On the next screen, click on the printer icon to the right of the **GAME RESULTS** header.

6. From here, the scoresheet will show up. It will be 2 pages. The first page is for rinks with the Home Bench to the left of the Scorekeeper, the second page is for the rinks with the Home Bench to the right of the Scorekeeper. Back on the TMSA, there is a document called **Players Bench Locations** that will tell you which side of the scorekeeper the players' benches are. I would advise printing and bringing both if you are unsure. To print the page either press CTRL-p or click the printer icon at the top right of the page.
