INJURY/ILLNESS AND CONDITION

On Field Emergency Protocol; Guidelines to Use During a Serious On-Field Player Injury:

- **Players and coaches should go to and remain in bench area once medical assistance arrives. Adequate lines of vision between the medical staffs and all available emergency personnel should be established and maintained.**
- **Players, parents and non-authorized personnel should be kept a significant distance away from the seriously injured player or players.**
- **Players or non-medical personnel should not touch, move or roll an injured player.**
- **Players should not try to assist a teammate who is lying on the field (i.e., removing the helmet or chin strap or attempting to assist breathing by elevating the waist).**
- **Players should not pull an injured teammate or opponent from a pile-up.**
- **Once the medical staff begins to work on an injured player, they should be allowed to perform services without interruption or interference.**
- **Players and coaches should avoid dictating medical services to the athletic trainers or team physicians. Avoid taking up their time to perform such services.**
