 - b. What would we like to spend the money on
- Covid Restrictions: Updates/Adjustments Needed
 - a. "People with COVID-19 should isolate for 5 days and if they are asymptomatic or their symptoms are resolving (without fever for 24 hours), follow that by 5 days of wearing a mask when around others to minimize the risk of infecting people they encounter."
 - b. Exposure to a Positive Case of COVID-19:
 - c. "Additionally, CDC is updating the recommended quarantine period for anyone in the general public who is exposed to COVID-19. For people who are unvaccinated or are more than six months out from their second mRNA dose (or more than 2 months after the J&J vaccine) and not yet boosted, CDC now recommends quarantine for 5 days followed by strict mask use for an additional 5 days. Individuals who have received their booster shot do not need to be quarantined following an exposure, but should wear a mask for 10 days after the exposure. For all those exposed, best practice would also include a test for SARS-CoV-2 at day 5 after exposure {THA will require this}. If symptoms occur, individuals should immediately quarantine until a negative test confirms symptoms are not attributable to COVID-19."
