

COVID Wellness Checks and Contact Tracing

North Durham United FC is required to implement Contact Tracing and ask the COVID wellness questions for each participant attending a Club activity. We are using the secure Canatrace application (www.canatrace.com).

Simply scan our QR code below. This will lead you to a secure site where you will be asked to submit your contact tracing information and answer the mandatory COVID-19 symptom screening questions. Upon completion and verification that you are symptom-free, you will receive approval through Canatrace.

When you attend an NDUFC sanctioned soccer activity, show our Field Marshal at the field check-in gate your mobile phone with the final Canatrace verification screen showing the green checkmark. This will verify to the Club your wellness on the day of the soccer activity, and permit you to enter the facility, knowing your health and data are safe.
