## The Fall sports season is coming quickly! Baseline Testing Special Summer Program

Throughout the summer, the Banner Sports Medicine and Concussion Center will offer "walk-in" baseline concussion testing for youth athletes.

Concussion baseline screening using the ImPACT neurocognitive test will be offered on a walk-in basis every Wednesday afternoon from May 15-July 31 (with the exception of July 3rd). This test is used with the NFL, NHL, MLB and most NCAA Division 1 institutions. Baseline testing gathers information about individual's normal or baseline cognitive function, which gives clinicians a point of reference when later evaluating the effect of injury.

### Why is Baseline testing important?

Whether young or old, athlete or not, the pre-injury status of neurological function identified through baseline testing ensures healthcare providers a better understanding of the impact of a concussion, should the injury occur.

**When:** Wednesday May 15, 22, 29; June 5, 12, 19, 26; July 10, 17, 24, 31  
1-4pm

**Where:** Banner Sports Medicine and Concussion Specialists  
1320 N. 10th St., Ste. B, Phoenix AZ 85006

**Cost:** \$25 - cash or check ONLY, please.

**Age:** Recommended for ages 11 and up, only.

**Contact:** Liz Whitley, ATC at 602.839.7383 with any questions.

**Comprehensive BrainStamp baseline testing and Pre-Participation Physicals are also available! Please give us a call to schedule an appointment at 602.839.7285.**
