

SIGN IN

The American Legion has moved to a single sign-on for its collection of websites. This allows American Legion members and non-members who are registered users of American Legion national websites the need to only have one username and password when they visit and sign in to: Legion.org, baseball.legion.org and the other national websites.

Before you can begin the 2021 ALB Online Team Application process, you must first re-register your previous season's User Email or create a new User account by following the simple steps below:

How to Register User Email or Make Sure Your Email is Registered.

1. Click on SIGN IN
2. On the next screen, click on "**Register**" (top right corner above Username field)
3. Enter your email address and **NEXT**
4. If you receive a message that says, "User registered", then your User Email has been registered. Skip down to step 9. If you did NOT get that message, go to step 5.

5. Enter your name, check the boxes granting permission for The American Legion to store data, and click **NEXT**
6. Enter password and confirm password
7. Click the "**Finish Registration**" button to receive your confirmation email
8. It is important in the confirmation email you **click the link to confirm your account**. The provided email will be from donotreply@legion.org. Please check your junk email folder if you do not see this email in your inbox. This step finalizes your account for single sign-on access.
9. If you received a "User registered" message , an OTP (One Time Password) will be sent to your email to verify account. The OTP email contains a code that must be entered into the registration form. After entering this code, you will be signed in or presented with additional instructions to complete the process. If you have tried to register your User Email more than once, you may have multiple OTP emails - so, check the email timestamp and use the most recent one. Please note that only the most recent OTP code will work.
