

Team Vision

Mission

We are here to become better people by challenging ourselves physically and mentally. We will work as a team, showing commitment and dedication to our individual and collective goals. We will support one another, remain positive, and help each other rise to high expectations.

Line-up Decisions

We will push to better ourselves through competition. We compete individually for the good of the team in this sport. Line-up decisions will be based on performance, match-ups, competitive strategy, practice attendance, work ethic, and attitude.

Leadership

We look forward to watching leaders emerge on this team. Effective leaders lead first by example, consistently being the guy he would want as a teammate. It is expected that all team members are attentive, engaged, and supportive throughout competition. Those leading the charge will be recognized as team captains. We will address this in a team discussion early in the season.

Communication

As coaches, we believe clear communication is important to team success. Please feel free to address any comments, questions, or concerns as the season progresses.
