[Starting a Stream and/or Recording](#)

[Video Tutorial](#)

Any Team Staff member (or Confirmed Team Member on teams with [Streaming Permissions](#) set to Confirmed Members) can start live streaming and recording video of their team's games in GameChanger with just a few taps. This is a free feature for Team Staff members or permitted Confirmed Team Members.

The Live Stream & Record feature gives users three options to create video content through the GameChanger app that can be broadcast live to users, or recorded to the device that can be uploaded later to a GameChanger event.

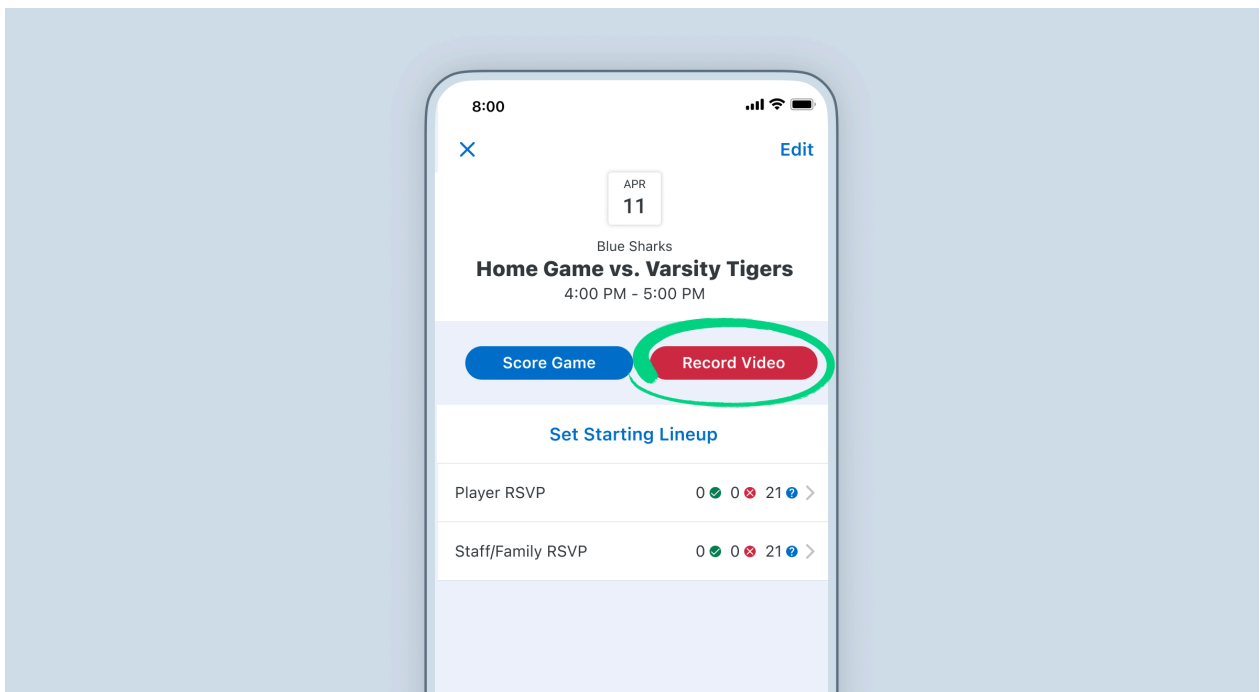

- **Live Stream Only** - A live video stream will be broadcast through GameChanger for users to see. Live stream only when you have a strong internet connection so that your community can watch from afar. You can also live stream only when you do not have enough storage or battery to record at the same time.

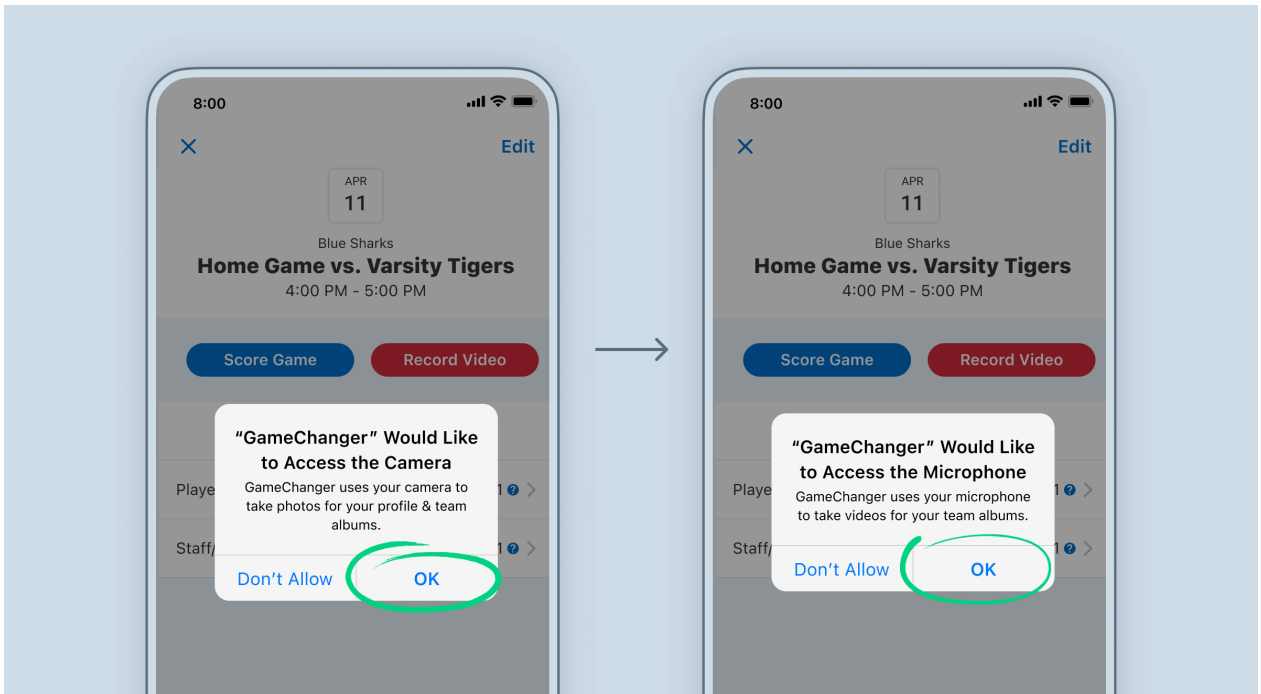

- **Live stream & record\* to device** - Stream & Record allows for a live video broadcast through GameChanger as well as a backup recording of the event on the user's device. Use this when you are not fully confident in the strength of your internet connectivity. Please note that you'll need enough phone storage and battery to do so.
- **Record\* to device only** - The user can record video directly to their device from the GameChanger app. Record video when you have little to no internet connection. Recorded videos can be uploaded after using our [Upload Full Event Video](#) feature.

## Starting a Stream and/or Recording

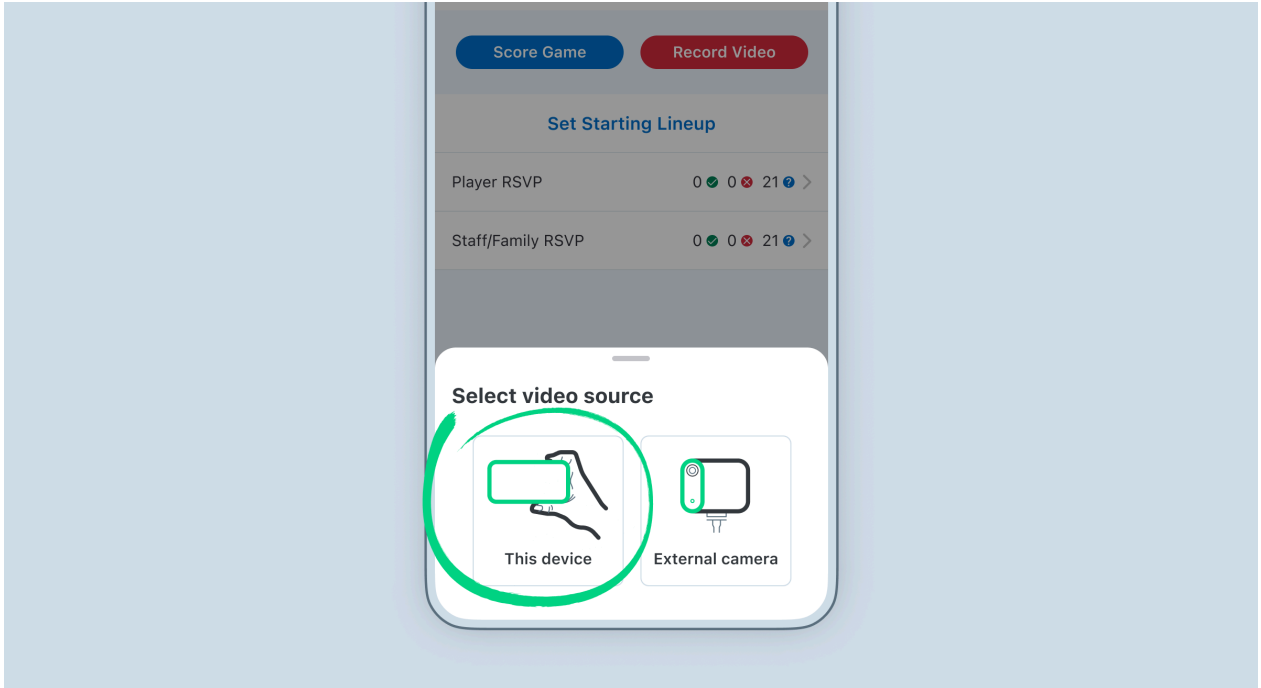

1. Select the appropriate team.
2. Navigate to the **Schedule** tab and select the event that you wish to stream.
3. Tap the **Record Video** button.

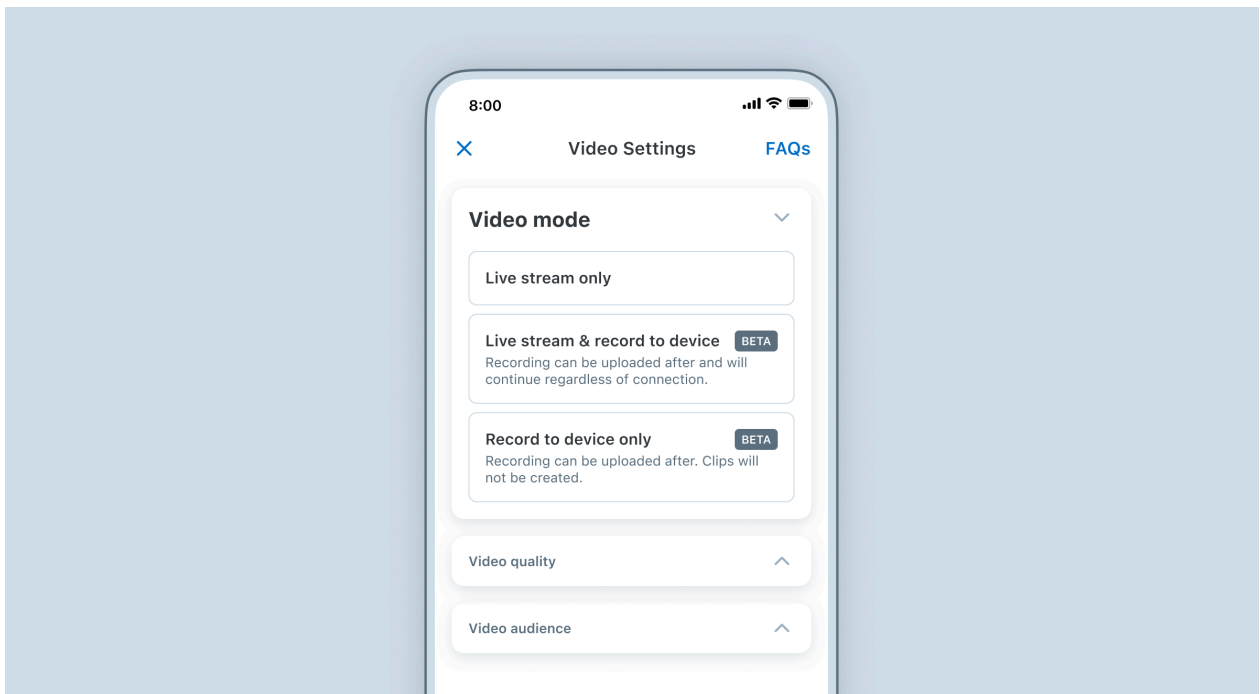

4. If you haven't previously used the feature, grant GameChanger permission to use your device's camera and microphone.

- 5. Select your video source. External camera users, please see our [Live Streaming from An External Camera](#) support article to complete the setup for external cameras.

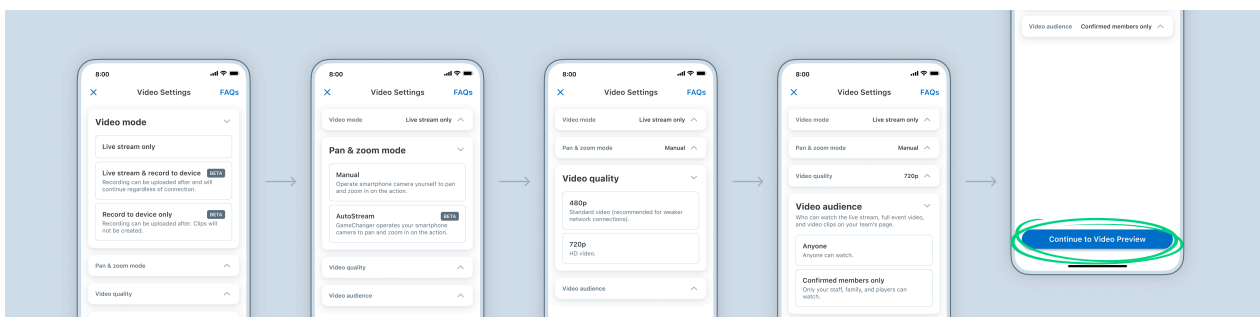

- 6. Choose your desired Video mode: Live Stream, Live Stream and record to device, or Record to device only.

7. Select your video quality and video audience for the live video stream. More information on who can see your live video stream can be found in our [Live Video Audience Control](#) support article.

\* Video recorded to the device will be recorded in 1080p. We estimate it will take between 10-12 GB of storage on your stream device per hour of recorded video.

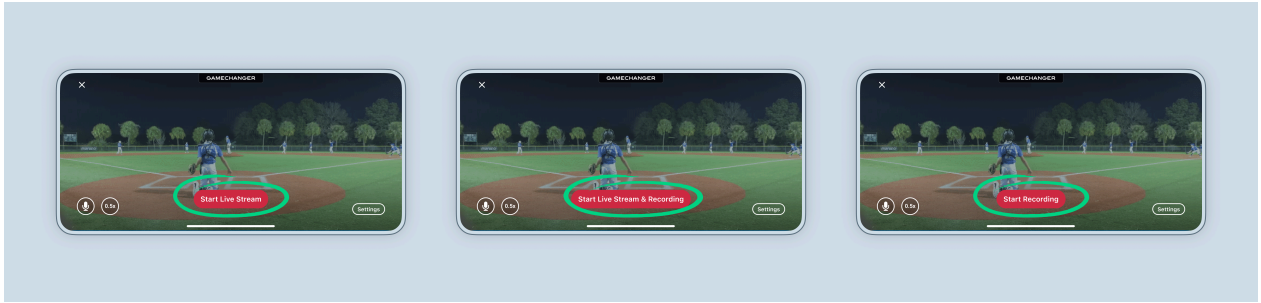

These settings will remain selected for the next stream.

Basketball users will have the ability to choose between Manual Pan & Zoom or [AutoStream](#) (iOS only)

After you have made your selections, tap Continue to Video Preview

8. Select **Start Live Stream** to start your stream. If you are recording, you will select **Start Live Stream & Record**, or **Start Recording**.

Please see our [Live Video Streaming FAQs](#) article for Frequently Asked Questions on Video Streaming.

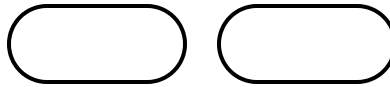

## Video Tutorial
