CLUB DIRECTORS' UPDATE – 12/6/2021 – SAFESPORT LMS TRANSITION UPDATE

Club Directors:

We've previously informed you that the online platform through which Safesport training is completed is due to transition over to a new system. Originally, this transition was scheduled to happen in November. There were several issues at the national level that prevented this transition from happening at that time.

We were informed over the weekend that this transition will now most likely be happening early tomorrow morning - Tuesday, December 7th. Here's what you need to know:

1 - Participants who have already completed their Safesport training for this season need to take no action whatsoever - their completion records will stay in their profiles, and they will not be impacted by this.

2 - Participants who have not started Safesport training, but are required to take it, should either get it done tonight, or wait until at least tomorrow afternoon to start it.

3 - Participants who have started Safesport already, but haven't finished it, need to get it done tonight - otherwise they will **lose their progress** when the transition happens, and will need to start their training over.

Our office will do the best we can to help you should any issues occur, but please understand that the US Center for Safesport has limited our ability to directly assist you in the new platform. Questions may be directed to us, but we'd ask for your patience while we try to find the best and most efficient answer for a particular scenario.

Thanks,
Cody March
