

Here are the final results for the recent meet at Essex Park. There was some confusion on the times reported for the junior varsity race. Originally, our runners were placed into two waves. In the results reported by Wayzata Results, the runners were placed into four waves. This means if we placed a runner in wave two and Wayzata Results placed him in wave four, the runner was actually given a two minute head start (according to the clock). To make things more confusing, the finish line clock may have been displaying the time for the second wave. Mayo reported the same issue.

Some kids may be disappointed with their new time, but many of these times are still personal bests. Many runners on the team are consistently dropping their times, so hopefully we can put this experience behind us and continue to improve. GO ROCKETS!
